## CHEVROLETS OF THE 1950S

## A DECADE OF TECHNICAL INNOVATION

*CarTech Inc* As the 1950s dawned, General Motors focused its industrial might on producing revolutionary rather than evolutionary cars with the ultimate goal to become the clear market leader in the automotive industry. To accomplish this goal, the company designed, developed, and consistently released innovative automotive technology. During the decade, Chevrolet introduced the small-block V-8, automatic transmission, air-conditioning, power steering, and many other innovations that made the cars faster, more comfortable, and safer. All of the pieces had fallen into place. General Motors had astute leadership, a brilliant engineering team, forward-thinking stylists, a massive manufacturing infrastructure, and the capability to produce cutting-edge technology. With unbridled optimism and exuberance to meet the demands of the booming U.S. economy of the 1950s, the company designed, developed, and delivered an unprecedented number of breakthrough technologies, and established the blueprint for the modern automobile. Automotive historian and veteran author David Temple goes behind the scenes to reveal how these technologies were designed, manufactured, and installed on Chevrolet's fine portfolio of cars: the Corvette, 1955-1957 Bel Air, Nomad, Impala, and many more. Inside General Motors, many dedicated and talented leaders who were determined to make Chevrolet cars the best on the market. Vice President of Styling Harley Earl and his team designed the 1952 Corvette concept car for the Motorama show. After receiving numerous accolades, it was rushed into production. Design chief Bill Mitchell used his design acumen and creative vision as he led his team to style the 1955-1957 Bel-Air. Zora Arkus-Duntov worked tirelessly and transformed the Corvette from a touring car into a genuine sports car. Ed Cole and his engineers overcame many challenges to develop the compact, efficient, and powerful Chevy small-block V-8, which continued in production for decades. Chevrolets of the 1950s retraces the design, development, and production of these cars, but it also covers innovative vital components that were installed in them. If you have been looking for the inside story on GM's arguably greatest decade, the models, and the technology it produced, you have found it.

**CHEVROLET'S ULTIMATE MUSCLE CARS**

---

---

*CarTech Inc* The COPO Camaros, Chevelles, and Novas of the 1960s and early 1970s were the ultimate high-performance GM muscle cars. While few knew about this back channel program at the time, it is now recognized as the origin of GM's top muscle cars. Dedicated Chevy racers and car owners were determined to compete head-to-head with Mopar and Ford at the racetrack and on the street. But in order to do so, they needed to circumvent the corporate ban on racing and resolve the restriction of 400-ci engines in intermediate vehicles. Don Yenko and some other creative individuals recognized the loophole in the COPO (Central Office Production Order) system at General Motors. The COPO program was designated for fleet vehicles such as taxicabs, but at the peak of the muscle car wars it was used to build the ultimate high-performance Chevy muscle cars. Some horrific on-track accidents compelled General Motors to drop out of racing, yet GM did not want to allow Chrysler and Ford to steal the glory on Sundays while they stood on the sidelines. As a result, GM inconspicuously ran the Chevy racing and high-performance program through back channels, and COPO was integral part of the program. Don Yenko became the COPO muscle car program chief architect and champion. He ordered the Corvair through the COPO program and created the Corvair Stinger to mount a SCCA road race campaign. From these humble beginnings, the road map for creating the ultimate Camaros, Chevelles, and Novas was established. Factory Camaro V-8s came equipped with the 350 small-block or 396 big-block, which had to compete with the Mustang Cobra Jets and Mopar Wedge and Hemi cars. In response, building the big-block Camaro through the COPO program was devised. At the factory, Camaros were fitted with the 396 engines and shipped to dealers where the 427s were installed in the cars. From 1967 to 1969, the factory and dealers installed eight different 427 engines, including the all aluminum ZL1 427. Later on, others used the road map to build COPO Novas and Chevelles to similar spec, with similar results. The COPO performance car program did not end with these muscle cars. Yenko even ordered several hundred Vegas through the COPO program, so they could be fitted with turbochargers and raced in SCCA competition. Chevy muscle car aficionado and author Matt Avery retraces the history of the COPO program and the creation of these premier muscle cars. He has scoured archives and tracked down owners and personnel involved in the program to deliver a comprehensive story and complete guide to the COPO cars. The COPO muscle car and racing program produced a storied and remarkable journey, and author Matt Avery captures all these facets in this entertaining and revealing history. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

**MUSINGS FROM A TEXAS HILL COUNTRY COFFEE SHOP**

---

---

*Xlibris Corporation* Many a famous tale began with Once upon a Time. While yet others led off with It was a dark and dreary night. Each author, using these openings, was attempting to set the tone for his or her story and poem that followed. None of the stories or poetry that follow in this book set their tone with such epic or historic and yes sometimes hackneyed openings. Instead they all begin with what the individual author considered a fresh perspective on a subject of either his or her choosing or one chosen for him/her. In order to better understand this last statement, an explanation of how these authors came together to write such stories is required. In 2005, Milli Thornton, the author of the book Fear of Writing, for writers & closet writers, established a writing group in a back room of Chickis Coffee Shop in the small Texas Hill Country community of Bulverde. Each Tuesday morning this eclectic group of would-be authors gathered, and over coffee and a variety of pastries would write for two hours. The two retired school teachers, a nurse and federal agent along with, an Irish lass, and an interior designer/artist would write their stories and poems from prompts offered by Thornton in her book or from other sources such as Texas Public Radio or WritersDigest.com. Making liberal use of their literary licenses, these writers crafted their pieces from these prompts by either embodying the entire prompt or selecting key words and or phrases from these prompts. On a number of occasions the single word the was chosen from the prompt and woven into a tale. Or the writers would choose a subject that was of importance to them at that moment. A tale from ones past; a rail against some minor injustice or poking fun at one of lifes inane situation became fodder for these authors. Just as important as the prompt or fertile material as Thornton refers to them as, was the understanding that the stories and poems, when read at the conclusion of each weekly meeting, would not be negatively critiqued unless requested by the author. Instead, each participant would receive positive feed-back and encouragement on his or her works in hopes that it would inspire him/her to continue writing. The theory behind this kind of writing support can best be articulated in the words of Thornton when she discussed unleashing your imagination. She advised, The more you flex it the more limber it becomes. Positive reinforcement was intended to aid in the limbering effort, to encouraging them to continue to write and therefore become better writers. That the theory proffered by Thorntons was effective one merely has to look at the limited success of several of the authors who have contributed to this book. Two authors submitted and had their short stories selected to be read on Texas Public Radio. One author received honorable mention in another short story competition. Another of this group of authors finished and published a novel and has completed another book that is being readied for publication. These accomplishments might have not been achieved had it not been for this writing group. Moreover, this book would have not been written had it not been for the desire and dedication of these authors who week in and week out continued to pour out their souls in their short stories. Over the succeeding years, numerous writers passed through this group. Some moved on as their life situations changed; others needed something other than what was offered by the group. And still others, decided for personal reasons that the group did not satisfy their writing needs. What remained, was a constant core of writers who continued to meet and toil each Tuesday or whenever possible. The stories and poems contained in this book are the works of that core of writers. This group of writers hope that you, the reader, get as much joy from reading this collection of short stories as their authors did in creating them. The book has been divided

**CHEVROLET PICKUPS**

---

In the pages of Chevrolet Pickups, you'll find a legendary tale of how Chevrolet's line of trucks evolved from cars with beds to the sophisticated luxurious trucks of modern times. Mueller's text includes the rise of the Depression-era trucks that made Chevrolet the number one manufacturer of light pickups, and Chevy's 30-year run in that top spot. Mueller explains how the leaders and engineers at Chevrolet made the company's truck line such a dominant force-" and goes in-depth on many specific models that had enormous impact on the pickup truck industry. "The complete history of Chevrolet trucks is covered, with side-trips that shed light on the GMC counterparts, competitive brands, and the ElCamino and Corvair pickups." Packed with photographs of beautifully restored pickup trucks, ""Chevrolet Pickups tells the history of one of the (20th) century's greatest accomplishments."

**THE CARS OF HARLEY EARL**

---

*CarTech Inc* At 6-foot, 3-inches tall, Harley Earl was an imposing figure, but his true stature lies in his towering talent for automotive design and styling. Over his 50-year career, he created as well as collaborated on the most innovative, bold, technologically advanced cars made by General Motors. As a titan of American auto design, the cars he helped create are still celebrated today. And as an enduring legacy, he inspired a generation of engineers, designers, and stylists. Veteran automotive historian David W. Temple has researched and unearthed the complete story of Harley Earl's cars, his notable design achievements, and many accolades. Working as a coachbuilder at his father's Earl Automotive Works in Hollywood, California, the young Earl learned his trade. After styling the 1927 LaSalle for GM president Alfred P. Sloan, Earl rose to prominence and ran the newly created department of Art and Color. Automobile design stagnated during the Depression and World War II, but the number of his contributions to the automotive world in the 1950s is staggering. When the jet age hit, he fully embraced aviation design and infused it into GM cars. The Buick Y-Job and GM Le Sabre featured many firsts in automotive design and hardware. The Y-Job's fender extensions trailing over the doors, disappearing headlamps, flush door handles, a metal cover over the convertible top were a few innovations. When General Motors needed to show off its cars and technology, Harley Earl-designed cars were the stars of the Motorama show that toured the country from 1949 to 1961. He led the team that created the 1953 Corvette, and this iconic American sports car is still going strong today. He was involved in the creation of the 1955-1957 Chevy Bel Air, otherwise known as the Tri-Five Chevy. Harley Earl's drive toward bold and innovative design spurred American car design during the mid-twentieth century. His distinctive designs defined the 1950s finned cars and set American automotive design on the path it has followed into the modern era. With this in-depth examination, you learn the inside story of these remarkable cars and the man behind them. It's an essential addition to any automotive library.

**CHEVY SS**

---

**THE SUPER SPORT STORY**

---

*MotorBooks International* On the 1957 auto show circuit, Chevrolet unveiled a show car based on its Corvette and dubbed it the "Super Sport." The performance car world took one look and never looked back. A combination of styling and performance upgrades, the SS package could turn something as mundane as a six-cylinder Malibu into the fire-breathing Chevelle SS396. This book traces the long line of legendary SS models, from Chevy's Super Sport version of its popular Impala, which marked the dawn of the muscle car era, to today's Impala SS. Featuring the work of acclaimed photo ace David Newhardt, Chevy SS: The Super Sport Story provides a close-up, detailed, full-color look at such classic muscle cars as the Chevelle, the El Camino, the Malibu, and the Monte Carlo as well as today's hot Camaro SS. The book is a fittingly elegant celebration of the cars that redefined "high performance" and defined an era.

### THE CAMBRIDGE COMPANION TO MODERN FRENCH CULTURE

---

*Cambridge University Press* France entered the twentieth century as a powerful European and colonial nation. In the course of the century, her role changed dramatically: in the first fifty years two World Wars and economic decline removed its status as a world power, whilst the immediate post-war era was marked by wars of independence in its colonies. Yet at the same time, in the second half of the century, France entered a period of unprecedented growth and social transformation. Throughout the century and into the new millennium France retained its former international reputation as a centre for cultural excellence and innovation and its culture, together with that of the Francophone world, reflected the increased richness and diversity of the period. This Companion explores this vibrant culture, and includes chapters on history, language, literature, thought, theatre, architecture, visual culture, film and music, and discuss the contributions of popular culture, Francophone culture, minorities and women.
