INTERNATIONALIZATION OF BUSINESS

CASES ON STRATEGY FORMULATION AND IMPLEMENTATION

Springer This book illustrates the various facets of internationalization in managerial practice, starting with a strategic outline of the many options firms have when formulating internationalization strategies. Designed as a textbook for Bachelor, Master and MBA classrooms, the core of the book consists of six case studies on firms from diverse industries, such as sporting goods, aviation, grocery discount, motorcycle, computer and IT, and fast-food. The cases present a variety of ways of entering and operating in foreign markets, such as export, franchising, joint ventures, strategic alliances, greenfield-investments, acquisitions and mergers. In addition to market entry strategies, the cases provide readers, educators and students with insights into target market strategies, timing strategies, allocation strategies and coordination strategies of well-known companies.

TRIUMPH EXPERIMENTAL

MOLECULAR SYMMETRY AND GROUP THEORY

A PROGRAMMED INTRODUCTION TO CHEMICAL APPLICATIONS

John Wiley & Sons This substantially revised and expanded new edition of the bestselling textbook, addresses the difficulties that can arise with the mathematics that underpins the study of symmetry, and acknowledges that group theory can be a complex concept for students to grasp. Written in a clear, concise manner, the author introduces a series of programmes that help students learn at their own pace and enable them to understand the subject fully. Readers are taken through a series of carefully constructed exercises, designed to simplify the mathematics and give them a full understanding of how this relates to the chemistry. This second edition contains a new chapter on the projection operator method. This is used to calculate the form of the normal modes of vibration of a molecule and the normalised wave functions of hybrid orbitals or molecular orbitals. The features of this book include: * A concise, gentle introduction to symmetry and group theory * Takes a programmed learning approach * New material on projection operators, and the calculation of normal modes of vibration and normalised wave functions of orbitals This book is suitable for all students of chemistry taking a first course in symmetry and group theory.

CARS, CARRIERS OF REGIONALISM?

Jorge Carrillo Viveros The car industry is considered one of the most archetypal global industries. Nevertheless, it looks more like a world of regions rather than a fully integrated global one. Does regionalism prevail over or complement globalization? Moreover, is there still room for unilateral (go-it-alone) strategies? This volume addresses these questions from the perspective of the car industry, the most important industrial 'carrier' of these developments. Cars, Carriers of Regionalism? provides an integral account of the geo-economic and geo-political dilemmas and opportunities faced by the car industry in developed as well as developing countries at the start of the 21st century. All major regional integration initiatives are covered and their feasibility is assessed, including go-it-alone efforts. This volume - written by leading scholars who have participated to the GERPISA international network's four-year research programme Globalization or Regionalisation for the Auto Industry? - is intended for both academics and practitioners/managers.

THE PRODUCTIVE MODELS

THE CONDITIONS OF PROFITABILITY

Palgrave MacMillan Until recently most observers were of the opinion that firms had to adopt a Japanese model of management or perish. They overlooked the fact that there are a number of efficient productive models and that there is no single 'best way'. This book shows the diversity of productive models and discusses the optimum macro and micro economic and social conditions that a firm needs to stay profitable. In conclusion the authors suggest an analytical framework of profitability conditions, easily accessible to practitioners, academics and students.
