Steve Schexnayder and Arno Zaritsky. Authorities in the field have come together to pen articles on Background and Epidemiology; CPR - Why the New Emphasis?; Airway Management; Arrhythmias, Cardioversion, and Defibrillation; Vascular Access and Medications; Medical Emergency Teams; Teamwork in Resuscitation; Resuscitation Education; Outcome Following Cardiac Arrest; Extracorporeal Life Support during CPR; Post-resuscitation Care; and Future Directions. **Community-Based Participatory Research for Health Advancing Social and Health Equity John Wiley & Sons** The third edition of Community-Based Participatory Research for Health provides the latest research and practice of community-based participatory research (CBPR) and community-engaged research. This new edition maintains its appeal for students, academics, and practitioners, with its practice-based orientation and health equity lens across multiple fields. With a majority of new chapters, the book provides a thorough overview of CBPR history, theories of action and participatory research, emerging trends of knowledge democracy, and promising practices. New material addresses the critical issues of: Racism, power, and privilege Trust development Ethical practice within and beyond IRBs Cultural humility; and many more. Organized around the CBPR Conceptual Model, all new case studies illustrate the importance of social context, promising partnering practices, and the added value of community and other stakeholder engagement for intervention development and research design. Partnership evaluation, measures, and outcomes are highlighted, with a revised section on policy outcomes, including global health case studies. Appendices showcase new CBPR tools, in the text and through web-links, such as: Principles of CBPR and community-engaged research Data sharing and ownership agreements Community-based IRB trainings Government and foundation funding Evaluation instruments and tools Policy-analysis methods **Make It Stick Harvard University Press** Discusses the best methods of learning, describing how rereading and rote repetition are counterproductive and how such techniques as self-testing, spaced retrieval, and finding additional layers of information in new material can enhance learning. **Making Eye Health a Population Health Imperative Vision for Tomorrow National Academies Press** The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels. **Electrical Wiring Residential Cengage Learning** Delivering the very latest in industry standards and procedures, longtime market leader ELECTRICAL WIRING RESIDENTIAL, 18e continues to provide comprehensive, authoritative coverage that fully implements the 2014 National Electrical Code. The book's signature three-part organization thoroughly covers Code, Electrical Knowledge, and Applications. Extremely reader friendly, it offers detailed--but not overly technical--explanations as it guides you step by step through the critical tasks and responsibilities that face today's professional residential electricians in both new construction and existing homes. Vivid Illustrations are fully coordinated with the latest NEC regulations and provide further clarity. In addition, foldout plans at the back of the book give you hands-on practice applying Code requirements. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem. **Strategies to Improve Cardiac Arrest Survival A Time to Act National Academies Press** Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States. **Culturally Engaging Service-Learning With Diverse Communities IGI Global** Evaluating the experiences of racially marginalized and underrepresented groups is vital to creating equality in society. Such actions have the potential to provoke an interest in universities to adopt high-impact pedagogical practices that attempt to eliminate institutional injustices. Culturally Engaging Service-Learning With Diverse Communities is a pivotal reference source for the latest scholarly research on service-learning models that recognize how systemic social injustices continue to pervade society. Featuring extensive coverage on a broad range of topics and perspectives such as cultural humility, oral histories, and social ecology, this book is ideally designed for scholars, practitioners, and students interested in engaging in thoughtful and authentic partnerships with diverse groups. **Oxygen Therapy for Children** "Hypoxaemia is a major contributor to child deaths that occur worldwide each year; for a child with pneumonia hypoxaemia increases the risk of death by up to 5 times. Despite its importance in virtually all types of acute severe illness, hypoxaemia is often not well recognized or well managed more so in settings where resources are limited. Oxygen therapy remains an inaccessible luxury for a large proportion of severely ill children admitted to hospitals in developing countries. This is particularly true for patients in small district hospitals, where, even if some facility for delivering oxygen is available, supplies are often unreliable and the benefits of treatment may be diminished by poorly maintained, inappropriate equipment or poorly trained staff with inadequate guidelines. Increasing awareness of these problems is likely to have considerable clinical and public health benefits in the care of severely ill children. Health workers should be able to know the clinical signs that suggest the presence of hypoxaemia and have more reliable means of detection of hypoxaemia. This be achieved through more widespread use of pulse oximetry, which is a non-invasive measure of arterial oxygen saturation. At the same time oxygen therapy must be more widely available; in many remote settings, this can be achieved by use of oxygen concentrators, which can run on regular or alternative sources of power. Having effective systems for the detection and management of hypoxaemia are vital in reducing mortality from pneumonia and other severe acute illnesses. Oxygen therapy is essential to counter hypoxaemia and many a times is the difference between life and death. This manual focuses on the availability and clinical use of oxygen therapy in children in health facilities by providing the practical aspects for health workers, biomedical engineers, and administrators. It addresses the need for appropriate detection of hypoxaemia, use of pulse oximetry, clinical use of oxygen and delivery systems and monitoring of patients on oxygen therapy. In addition, the manual addresses practical use of pulse oximetry, and oxygen concentrators and cylinders in an effort to improve oxygen systems worldwide."--Publisher's description **Early Education Curriculum: A Child's Connection to the World Cengage Learning** The sixth edition of EARLY EDUCATION CURRICULUM: A CHILD'S CONNECTION TO THE WORLD focuses on the process of planning and implementing a curriculum, and setting up an inclusive child-centered environment. This text meets the needs of a diverse range of students and experienced teachers, helping them to make informed decisions about curriculum content as well as to develop creative thinking and the ability to effectively apply theory to an early childhood classroom setting. Updated to include the most current research and standards, the sixth edition presents new material on brain research that underlies teaching ideas as well as new information on reflective practice, intentional teaching, and using the environment as a teaching tool. The book retains its strong applied focus on the how-to's of teaching, with many new hands-on teaching tips and six new chapters on topics such as observation and assessment, fine motor and manipulatives, and large motor and outdoor play. Rather than improving life, multitasking, "user-friendly" technology, and the culture of convenience are producing disorders that range from depression to attention deficit disorder to borderline personality disorder. Byung-Chul Han interprets the spreading malaise as an inability to manage negative experiences in an age characterized by excessive positivity and the universal availability of people and goods. Stress and exhaustion are not just personal experiences, but social and historical phenomena as well. Denouncing a world in which every against-the-grain response can lead to further disempowerment, he draws on literature, philosophy, and the social and natural sciences to explore the stakes of sacrificing intermittent intellectual reflection for constant neural connection. **Presentation Zen Simple Ideas on Presentation Design and Delivery Pearson Education** FOREWORD BY GUY KAWASAKI Presentation designer and internationally acclaimed communications expert Garr Reynolds, creator of the most popular Web site on presentation design and delivery on the Net — presentationzen.com — shares his experience in a provocative mix of illumination, inspiration, education, and guidance that will change the way you think about making presentations with PowerPoint or Keynote. Presentation Zen challenges the conventional wisdom of making "slide presentations" in today's world and encourages you to think differently and more creatively about the preparation, design, and delivery of your presentations. Garr shares lessons and perspectives that draw upon practical advice from the fields of communication and business. Combining solid principles of design with the tenets of Zen simplicity, this book will help you along the path to simpler, more effective presentations. **Cardiopulmonary Resuscitation Springer Science & Business Media** An in-depth review by leading authorities of the latest therapies and techniques for rescuing persons in cardiac arrest. The authors explore the physiology behind current state-of-the-art clinical resuscitation and translate it into practical bedside recommendations, clinical tips, and expert techniques. Topics of interest include the epidemiology of sudden death, management of ventilation, chest compression technique training, public access defibrillation, drug delivery during CPR, the latest drug therapies, and cardiac arrest in disease, pregnancy, drowning, lightning strike, and trauma. The authors also review the major ongoing research in resuscitation science that will likely affect the next set of international resuscitation guidelines. **Code of Ethics for Nurses with Interpretive Statements Nursesbooks.org** Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's own understanding of its commitment to society. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream" is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, The Hundred-Year Marathon reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders – as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped – sometimes unwittingly and sometimes deliberately – to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. The Hundred-Year Marathon is a wake-up call as we face the greatest national security challenge of the twenty-first century. **Essentials of Pharmacology for Health Professions Cengage Learning** Now in its 7th Edition, ESSENTIALS OF PHARMACOLOGY FOR HEALTH PROFESSIONS is the best-selling resource for those preparing for licensed practical nursing, medical assisting, and other allied health careers. **European Paediatric Advanced Life Support The Health Effects of Cannabis and Cannabinoids The Current State of Evidence and Recommendations for Research National Academies Press** Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. The Health Effects of Cannabis and Cannabinoids provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agenda that outlines gaps in current knowledge and opportunities for providing additional insight into these issues that summarizes and prioritizes pressing research needs.
