This is an exciting book to keep, so make sure you get a copy no* **Social Studies Review Journal of the California Council for the Social Studies The Conscious Teacher Page Publishing Inc** *The Conscious Teacher is about all kinds of strategies and techniques educators might employ to become more effective teachers. In an accessible, conversational style, Deborah Nichols Poulos presents unique approaches to teaching that will inspire new and veteran teachers alike. She begins with her personal story of not being able to read all through elementary school. Her early failures convinced her she was dumb. At first, she struggled, but when she still failed, she adopted an avoidance strategy that served her well until junior high. An experience in the seventh grade flipped a switch and started her on a journey to becoming an outstanding student and, later, to applying the lessons she learned as a child to her own teaching What makes The Conscious Teacher unique are the inspirational*

lessons that are unlike what most teachers get in their teacher-education courses or student teaching. Ms. Nichols Poulos points out, for example, that from the very first day, it is important that students learn they will be treated with dignity and respect no matter what. And especially helpful are the steps Ms. Nichols Poulos employs to set up a behavior management plan that works. She explains the strategic steps she takes before school starts—how essential it is to get to know each student before they walk into class on that first day. She also illustrates how setting up classroom routines helps students know what to expect and how to make the best use of every minute. And she emphasizes the importance of the parent-student-teacher team and includes many examples of how to communicate with—and involve—parents, even those who may be difficult. Foundational to her program are reading and writing. Among other things, she lays out the steps for students—even as early as fourth grade—to write five paragraph essays and their own student-authored books, and to research and write reports that include bibliographies. When she differentiated curriculum to support all students' needs, she found their learning accelerated. All teachers will appreciate her ideas about how to teach the basics of math, as well as advanced math concepts. And her ideas for teaching the arts are inspirational, as she describes in detail how her fourth graders performed Shakespeare's *Hamlet*, *Macbeth*, *King Lear*, *Julius Caesar*, and *A Midsummer Night's Dream*. She also shows how to integrate social studies with literature and writing. Her experiences taught her that young students are much more capable than many people realize. *The Conscious Teacher* is an indispensable guide for all new teachers. Many of the ideas Ms. Nichols Poulos provides will also be an eye-opener for parents and experienced teachers as well. *The Conscious Teacher* is simply a must have for anyone truly interested in giving young children a positive and solid foundation for their later schooling.

**Social Studies Left Back A Century of Battles Over School Reform Simon and Schuster** *Explores the last hundred years of reform programs designed radically to improve American schools, arguing that reformers often lose sight of the primary goal of the educational system.*

**No Citizen Left Behind Harvard University Press** *While teaching at an all-black middle school in Atlanta, Meira Levinson realized that students' individual self-improvement would not necessarily enable them to overcome their profound marginalization within American society. This is because of a civic empowerment gap that is as shameful and antidemocratic as the academic achievement gap targeted by No Child Left Behind. No Citizen Left Behind argues that students must be taught how to upend and reshape power relationships directly, through political and civic action. Drawing on political theory, empirical research, and her own on-the-ground experience, Levinson shows how de facto segregated urban schools can and must be at the center of this struggle. Recovering the civic purposes of public schools will take more than tweaking the curriculum. Levinson calls on schools to remake civic education. Schools should teach collective action, openly discuss the racialized dimensions of citizenship, and provoke students by engaging their passions against contemporary injustices. Students must also have frequent opportunities to take civic and political action, including within the school itself. To build a truly egalitarian society, we must reject myths of civic sameness and empower all young people to raise their diverse voices. Levinson's account challenges not just educators but all who care about justice, diversity, or democracy.*

**Powerful Social Studies for Elementary Students Cengage Learning**

*POWERFUL SOCIAL STUDIES FOR ELEMENTARY STUDENTS* examines the nature and purpose of social studies as it outlines ways to select content and teach history, geography, and social sciences more meaningfully. These respected authors present principles and illustrative examples to help pre-service and in-service teachers plan well-organized social studies instruction that produces positive student outcomes.

The Third Edition emphasizes the importance of using developmentally appropriate content and methods when helping students to develop social understanding and civic action, and includes a solid research base that is reflective of the current NCSS standards. Rather than advocating the elimination of the traditional content framework used to organize the social studies curriculum ('expanding communities framework'), the authors call for retaining the most important topics that have traditionally been emphasized and for teaching these topics in 'more coherent and powerful ways.'
