COLOUR ATLAS OF OPHTHALMIC PLASTIC SURGERY E-BOOK

Elsevier Health Sciences Known for its superb, step-by-step photo sequences, Colour Atlas of Ophthalmic Plastic Surgery, 4th Edition, by Drs. A. G. Tyers and J. R. O. Collin, remains your first choice for gaining essential knowledge in oculoplastic surgery. Ideal for both novices and experienced surgeons, this award-winning title offers comprehensive coverage of ophthalmic plastic surgery including eyelids, brows, and mid-face – all highlighted by unsurpassed photographic sequences and explanatory text that depict key stages of each procedure. New photos and new operative series, as well as major updates throughout the book, make this an invaluable resource for your practice. Includes updated coverage of ptosis surgery, lid and periocular reconstruction, and blepharoplasty and forehead rejuvenation.

A COLOUR ATLAS OF MINOR SURGERY

Wolfe Publishing (SC)

COLOUR ATLAS OF MINOR SURGERY IN GENERAL PRACTICE

Springer Science & Business Media The New Contract which came into force on April 1st 1990 includes proposals for the provision of minor surgery services by the General Practitioner. The aim of this book is to assist those doctors undertaking minor surgery in their Practices. It is intended to present a practical, clear and concise text. This is accompanied by easy to follow illustrations. The contents of the book are governed by two considerations. Firstly, it covers only those procedures which are safe for the patient. Secondly, it only includes minor surgery which it is possible for the ordinary General Practitioner in a busy practice to undertake. VII Chapter One The Advantages of Minor Surgery in General Practice Minor Surgery:- Despite this descriptive term, no surgery can be considered "minor" no matter where it is carried out! It requires a knowledge of anatomy and basic surgical principles. There must be an understanding of the procedures and technical skills required. Careful planning is needed at all stages. Arrangements must also be made to deal with any complications and disasters which may occur. Having stated these provisos, however, surgical procedures can and should be an important part of general practice within the British National Health Service (NHS). There are many advantages to be gained, both for patient and doctor, when minor surgery is undertaken by the general practitioner.

BROWN'S SKIN AND MINOR SURGERY

A TEXT & COLOUR ATLAS, FIFTH EDITION

CRC Press This authoritative, highly illustrated text and color atlas provides a systematic guide to commonly performed minor surgical and dermatology procedures. Accompanied by video clips, this critical resource on skin and minor surgery is designed for all trainees and practitioners, including experienced surgeons, dermatologists, family doctors, nurses, and the supporting healthcare team. Divided into four main color-coded sections, the book covers essential background information including postoperative management and aftercare, the key knowledge required for diagnosis and management, and the skills necessary to perform procedures step by step. Comprehensive coverage—Learn to perform a whole range of procedures from small skin surgical procedures to vasectomy Step-by-step techniques—See how to perform each technique with numerous color illustrations, animations and video clips Practical advice, boxes, tables, warnings, and indications of difficulty level—Achieve success and avoid common pitfalls Authoritative yet contemporary—Gain wisdom from this long-established, trusted book brought completely up to date by today's practitioners

COLOR ATLAS OF STRABISMUS SURGERY

STRATEGIES AND TECHNIQUES

Springer Strabismus can be devastating to patients, yet often difficult to treat, even for the most seasoned veteran. The Atlas of Strabismus Surgery, Fourth Edition clearly and succinctly shares with the reader strategies and surgical techniques to improve the care of patients, starting with the simple basics and progressing to more complicated procedures. Updated from the successful third edition, the atlas is designed for resident ophthalmologists and experienced strabismologists alike. Complete with hundreds of color illustrations, The Atlas of Strabismus Surgery, Fourth Edition covers the management of a wide range of strabismus disorders, from the relatively simple horizontal strabismus, to the complex cyclo-vertical deviations.

COLOR ATLAS OF OCULOPLASTIC SURGERY

Lippincott Williams & Wilkins Color Atlas of Oculoplastic Surgery provides surgeons familiar with surgical anatomy with a broad survey of contemporary oculoplastic surgery. It illustrates and provides basic information on surgical techniques that are straightforward and reliable in managing many common oculoplastic conditions that a clinician may encounter in practice. The material is presented with precision and clarity, there is special emphasis on understanding the pathophysiologic mechanism of diseases. This integrated text, accompanied by color photographs and complementary line drawings, guides the surgeon through each procedure in a systematic fashion. Pertinent anatomy, surgical indications, important technical considerations, and complications receive appropriate emphasis in each chapter.

COLOR ATLAS OF BURN RECONSTRUCTIVE SURGERY

Springer Science & Business Media Post-burn scar contractures are a commonly encountered problem in the field of plastic and reconstructive surgery. Nevertheless, many physicians still lack adequate knowledge on beneficial treatments. In this up-to-date atlas, leading specialists in post-burn treatment and the reconstruction of post-burn scar contractures depict in detail not only surgical techniques but also a variety of advantageous wound treatments. Many new methods invented by the authors are presented. Operative techniques are depicted in detail, and clear guidance is provided on selection of the most appropriate flap surgery. Advice is also given on how to prevent permanently disabling restriction of joint movement as a result of contractures and how to achieve good aesthetic reconstruction. This atlas is designed to appeal to a wide audience, from beginners to specialists. It will prove invaluable for doctors of every kind who deal with wound management.

COLOR ATLAS OF HEAD AND NECK SURGERY

A STEP-BY-STEP GUIDE

Springer Nature This surgical atlas, now in its second edition, provides superbly illustrated step-by-step descriptions of a wide range of open head and neck procedures, including radical and conservative approaches, aesthetic and reconstructive surgeries with the use of axial and free flaps, and surgery within the narrow confines of the skull base. Individual chapters are dedicated to surgery of the nose and paranasal sinuses, larynx and trachea, thyroid, salivary glands, mandible, face and lips, and head and neck, the repair of external nose defects, the use of axial and free flaps, and surgical treatment of temporal bone malignancies. The new edition, written by experts from across the world, covers a number of additional topics, such as pediatric head and neck surgery, laser surgery, and robotic surgery. It also features improved surgical photographs, enhanced descriptions of essential procedures, identification of pitfalls, many practical tips and best references available for each procedure to assist readers. The atlas will be a comprehensive practical reference for clinicians in all specialties involved in head and neck surgery, including otolaryngologists, head and neck surgeons, plastic surgeons, maxillofacial surgeons, and surgical oncologists.

A COLOUR ATLAS OF GYNAECOLOGICAL SURGERY

ABDOMINAL OPERATIONS FOR BENIGN CONDITIONS. VOL. 2

COLOR ATLAS OF DENTAL IMPLANT SURGERY - E-BOOK

Elsevier Health Sciences Use this atlas-style guide to master implant procedures and techniques! Written by leading expert Michael S. Block, DMD, Color Atlas of Dental Implant Surgery, 3rd Edition provides clear, full-color clinical photos and practical instructions covering a wide range of implant challenges. It takes you through treatment planning, presurgical guidelines, detailed surgical techniques, and postoperative follow-up. This edition adds more case studies and coverage of computed tomography. With this book, you'll be able to address any implant-related situation and achieve optimal results! This title includes additional digital media when purchased in print format. For this digital book edition, media content is not included. Clear step-by-step procedures include indications,

contraindications, and treatment results for each procedure. Over 1,400 full-color photographs and drawings depict important concepts and techniques, and show treatment from beginning to end. Indications and contraindications for each procedure provide details of why a procedure is performed. A discussion of the result of prosthodontic treatment is provided for each case, explaining how implant placement factors into successful therapy. Chapters are organized by oral anatomy and surgical technique, with each chapter presenting a different area of the mouth or a specific surgical technique. The Mandible section covers various approaches to augmentation of the atrophic mandible, including a case that utilizes distraction osteogenesis. Detailed cases of posterior mandible surgery demonstrate onlay bone harvesting and grafting the deficient ridge. The Maxilla section features sinus grafting, hard and soft tissue procedures, and the relatively new zygomaticus implant procedure. References are provided at the end of every chapter for additional reading and research.

A COLOUR ATLAS OF SURGERY FOR VARICOSE VEINS

COLOR ATLAS OF THYROID SURGERY

OPEN, ENDOSCOPIC AND ROBOTIC PROCEDURES

Springer Science & Business Media This color atlas is a detailed guide on how to perform open, endoscopic, and robotic thyroidectomy techniques safely and effectively. Each chapter offers step-by-step descriptions of essential surgical procedures and techniques. Relevant information is included on surgical anatomy, and clear guidance is provided on preoperative set-up, draping, instrumentation, and complications and their treatment. The description of endoscopic thyroidectomy techniques focuses on the bilateral axillo-breast approach (BABA), while in the case of robotic thyroidectomy both BABA and the bilateral axillo-postauricular approach are described. In each case, the evidence supporting the technique is carefully examined. In the closing chapter, the role of new energy sources in thyroid surgery is discussed. The lucid text is supported by more than 200 full-color illustrations clarifying surgical anatomy, instrumentation, and procedures, and surgical video clips are also available to readers via a website. This atlas will be invaluable in enabling surgeons to achieve optimal outcomes when performing thyroid surgery.

COLOR ATLAS OF HEAD AND NECK SURGERY

A STEP-BY-STEP GUIDE

Springer This surgical atlas, featuring a wealth of color photographs, provides detailed step-by-step descriptions of a wide range of open head and neck procedures, including radical and conservative (organ preservation, functional) approaches, aesthetic and reconstructive surgeries with the use of axial and free flaps, and surgery within the narrow confines of the skull base. Individual chapters are dedicated to surgery of the nose and paranasal sinuses, larynx and trachea, thyroid, salivary glands, mandible, face and lips, and neck, the repair of external nose defects, the use of axial and free flaps, and surgical treatment of temporal bone malignancy. The atlas will be a comprehensive practical reference for clinicians in the various specialties involved in head and neck surgery, including otolaryngologists, head and neck surgeons, plastic surgeons, maxillofacial surgeons and surgical oncologists. It will assist practitioners in achieving the high level of competence that is essential owing to the large number of vital structures in the head and neck region.

COLOR ATLAS OF CONGENITAL HEART SURGERY

Springer Science & Business Media This thorough revision of Color Atlas of Congenital Heart Surgery features 700 vividly reproduced intraoperative images taken with a special side-mounted flash. They convey exquisite perception of depth in the operative field in full color. The atlas presents surgical techniques for the full spectrum of cardiac congenital anomalies. This includes revised and updated text on many topics such as repair of straddling tricuspid valve associated with the posterior ventricular septal defect. Throughout the text, the carefully labeled photographs provide vivid representation of three-dimensional spatial relations of congenital anomalies and surgical anatomy.

A COLOUR ATLAS OF PREPROSTHETIC SURGERY

COLOR ATLAS OF BRAINSTEM SURGERY

Thieme The highly complex specialty of brainstem surgery requires many years of study, a focus on precision, and a passionate dedication to excellence to prepare the neurosurgeon for navigating significant anatomic challenges. Although the brainstem is technically surgically accessible, its highly eloquent structure demands rigorous surgical decision-making. An in-depth understanding of brainstem and thalamic anatomy and the safe entry zones used to access critical areas of the brainstem is essential to traversing the brainstem safely and successfully. This remarkable, one-of-a-kind atlas draws on the senior author's decades of experience performing more than 1,000 surgeries on the brainstem, thalamus, basal ganglia, and surrounding areas. Its content is organized by anatomic region, enabling readers to study separate subdivisions of the brainstem, each of which has its own unique anatomic and surgical considerations. From cover to cover, the atlas provides readers with technical guidance on approach selection, the timing of surgery, and optimization of outcomes-elucidated by more than 1700 remarkable color illustrations, dissections, clinical images, and line drawings. Key Highlights Beautifully detailed, highly sophisticated brain slices and dissections by Kaan Yagmurlu, who trained under the internationally renowned neuroanatomist and neurosurgeon Albert Rhoton Jr. Color illustrations clearly labeled with callouts and other indicators of foci of interest delineate multiple safe entry zones to the brainstem More than 50 detailed patient cases highlight each patient's history of previous neurological disorders, presenting symptoms, preoperative imaging, diagnosis, the planned surgical approach, patient positioning, intraoperative and postoperative imaging, and outcome Seven animations and more than 50 surgical videos elucidate approach selection, anatomy, and surgical outcomes of thalamic region and brainstem lesions This illuminating atlas provides insights into the complexities of the hallowed halls of the brainstem. Neurosurgeons and neurosurgical residents alike who glean knowledge from the clinical pearls throughout each section will no doubt become more adept surgeons, to the ultimate benefit of their patients.

COLOR ATLAS OF TEMPOROMANDIBULAR JOINT SURGERY

Year Book Medical Pub This brilliant color atlas describes a range of surgical procedures from open joint surgery to total joint replacement. It deals with one of the most vexing problems for oral and maxillofacial surgeons selecting the proper surgical option for patients who have exhausted all conservative methods of dealing with TMJ pain and dysfunction. The book's major focus is on internal derangement, trauma, and management of benign and malignant disorders. COLOR ATLAS OF TEMPOROMANDIBULAR JOINT SURGERY illustrates the technical aspects of various surgical procedures on the temporomandibular joint, focusing on open joint surgical procedures. Potential surgical modalities explored include: arthroscopy, meniscal repair, and the use of autogenous and alloplastic materials in joint reconstruction. Written by an authoritative, highly respected surgeon whose surgical skills are in great demand. Presents the basics of etiology, diagnosis, and treatment of TMJ disorders to simplify often complex problems. Surgical procedures are illustrated in a step-by-step format to take the surgeon through the procedure in a manner that he will be able to duplicate when he performs the surgery. Hundreds of vivid color photographs were created with painstaking care to demonstrate a clean surgical field, free of blood, so that intraoperative views and anatomic structures are readily visualized. Includes a separate chapter on orthognathic surgery and its related surgical complications to provide essential information on the all-too-common complications of orthognathic surgery. Includes a collection of treatment flow sheets (algorithms) for each possible kind of temporomandibular joint surgery to clarify the decision-making process involved in diagnosing and treating all varieties of TMJ disorders. Features an excellent collection of computer-generated art maximum clarity in illustrating crucial procedures.

COLOUR ATLAS OF SURGICAL TECHNIQUE

JP Medical Ltd This book is a concise guide to neck dissection procedures for practising and trainee otolaryngologists. Beginning with an introduction to the classification of neck dissections and incisions, the following chapters describe techniques for different sections and disorders of the neck. Complete chapters are dedicated to selective neck dissection. Detailed technical and anatomical descriptions of techniques are accompanied by life-like diagrams to enhance learning. The atlas is authored by recognised experts from University of Oklahoma College of Medicine. Key points Concise guide to neck dissections for otolaryngologists and trainees Covers classification, incisions and techniques for different sections and disorders Features life-like diagrams to accompany detailed text Expert authors from University of Oklahoma College of Medicine

COLOR ATLAS OF COSMETIC OCULOFACIAL SURGERY

Elsevier Health Sciences Color Atlas of Cosmetic Oculofacial Surgery, 2nd Edition by Drs. Chen and Kahn is an invaluable tool for all oculoplastic surgeons, plastic surgeons, ophthalmologists, dermatologists, facial plastic surgeons, and head and neck specialists. Fully updated and revised, the new edition of this pictorial guide incorporates new chapters, a procedural DVD-ROM, high-quality color images, and so much more to keep you on the cusp of this rapidly growing field. Detailed discussions on the newest procedures such as revision surgery approaches and minimally invasive dermatologic procedures keep you ahead of the competition. Offers the expertise of oculoplastic surgeons who are fellows of the American Society of Ophthalmic Plastic and Reconstructive Surgery. Evaluates and recommends the most effective treatment for each patient problem to help you create the best possible results. Illustrates every procedure with clear original line drawings and crisp color photographs for step-by-step visual guidance. Features step-by-step surgical videos, narrated by the authors, on the accompanying DVD-ROM that help you perfect your technique. Covers the newest procedures, including revision surgery approaches, fillers, and minimally invasive dermatologic procedures, keeping you ahead of the competition. Presents updated information on laser surgery, Asian eyelid surgery, and BOTOX®, to help you stay current on practical proven techniques. Includes new chapters on Cosmetic Botulinum Neurotoxin Application, Advanced Concept of a Glide Zone as it

Relates to Upper Lid Crease, Lid Fold and Application in Upper Blepharoplasty, Advanced Concept of Beveled Approach in Revisional Asian Blepharoplasty: Resetting of High Crease, Botulinum Toxin and Dermal Filler Use in the Periorbital Areas, and Hyaluronic Acid Filler Injection. Incorporates more than 550 full-color illustrations for enhanced visual guidance.

COLOR ATLAS OF PEDIATRIC SURGERY

Elsevier Science Limited This atlas depicts the clinical manifestations and surgical management of major congenital and acquired pediatric conditions.

A COLOUR ATLAS OF COLORECTAL SURGERY

A colour atlas containing photographs of various surgical operations in the field of colo-proctology. Most of the commonly performed operations, both elective and emergency are described and illustrated. The book is aimed at both surgical registrars and more experienced surgeons.

COLOR ATLAS OF MICROSURGERY IN ENDODONTICS

W B Saunders Company Dr. Syngcuk Kim, a world leader in microsurgical endodontic techniques, introduces advancements to the dental community in this book. This atlas showcases the most recent advances in microsurgical techniques and instrumentation, in a full-color reference format with 380 brilliant illustrations. Current topics include a comparison of traditional surgery and microsurgery in endodontics, microsurgical instruments, operation of the microscope, soft tissue management, and retropreparation. The book includes actual case histories. This book concentrates on the proven surgical practices of Dr. Kim Includes information on the inner workings of the operation microscope and the best way to work with the scope, ultrasonic unit and the new generation of microsurgery instruments created specifically for endodontics Specific chapters devoted to presurgical evaluations and premedications An entire chapter features case selections that clearly delineate the need for surgical intervention

COLOR ATLAS AND SYNOPSIS OF VASCULAR DISEASE

McGraw Hill Professional Hundreds of High-Quality Images Span the Entire Spectrum of Vascular Disease INCLUDES DVD WITH IMAGE BANK Color Atlas of Vascular Diseases is designed to help you properly identify and manage vascular diseases involving the arterial, venous, and lymphatic system. It offers a clinical and synoptic approach to the full range of diagnostic and therapeutic considerations in vascular diseases. You will find hundreds of state-of-the-art clinical, diagnostic, and interventional images, along with concise, bulleted text detailing the diagnosis and patient management. This unique combination atlas and learning text written by experts in the field, integrates the fields of vascular medicine, vascular surgery, and endovascular therapy in an effective, easy-to-learn fashion. Chapters feature succinct bulleted teaching points combined with photographs of vascular pathology. When appropriate, vivid arteriographic and ultrasonographic images are also included. Topics include: Lower Extremity Arterial Disease Aortic and Upper Extremity Arterial Disease Carotid Artery Occlusive Disease Aneurysmal Disease Non-Atherosclerotic Disorders Arteriovenous Visceral Disease Venous Disease Limb Swelling Vasospastic and Vasculitic Diseases Environmental Diseases Limb Ulcerations

COLOR ATLAS OF LAPAROSCOPIC LIVER RESECTION

Springer Nature This atlas describes and illustrates in detail the surgical procedures employed in laparoscopic anatomical liver resection, according to tumor location. The surgical approach and techniques are explained for each type of laparoscopic liver resection based on the involved anatomical segment, section, and hemi-liver. Attention is also drawn to potential complications and the means of preventing and managing them. Beyond anatomical liver resection, guidance is provided on non-anatomical resections that do not pay regard to segmental, sectional, or lobar anatomy. The coverage is completed by the inclusion of useful information on instruments and energy devices as well as the basic skills required for laparoscopic liver resection. In presenting a clear practical approach to each laparoscopic anatomical major and minor resection, the Color Atlas of Laparoscopic Liver Resection will be an invaluable guide for trainees. In addition, it will equip more experienced surgeons with much useful information that will enable them to further improve their technique.
