## Eating Drugs

## Psychopharmaceutical Pluralism in India

NYU Press A Hindu monk in Calcutta refuses to take his psychotropic medications. His psychiatrist explains that just as his body needs food, the drugs are nutrition for his starved mind. Does it matter how—or whether—patients understand their prescribed drugs? Millions of people in India are routinely prescribed mood medications. Pharmaceutical companies give doctors strong incentives to write as many prescriptions as possible, with as little awkward questioning from patients as possible. Without a sustained public debate on psychopharmaceuticals in India, patients remain puzzled by the notion that drugs can cure disturbances of the mind. While biomedical psychopharmaceuticals are perceived with great suspicion, many non-biomedical treatments are embraced. Stefan Ecks illuminates how biomedical, Ayurvedic, and homeopathic treatments are used in India, and argues that pharmaceutical pluralism changes popular ideas of what drugs do. Based on several years of research on pharmaceutical markets, Ecks shows how doctors employ a wide range of strategies to make patients take the remedies prescribed. Yet while metaphors such as "mind food" may succeed in getting patients to accept the prescriptions, they also obscure a critical awareness of drug effects. This rare ethnography of pharmaceuticals will be of key interest to those in the anthropology and sociology of medicine, pharmacology, mental health, bioethics, global health, and South Asian studies.

## Islam in Bangladesh

BRILL This study, done within the comprehensive Weberian framework, focuses on religion and social change in Bangladesh through an imaginative use of qualitative as well as quantitative methods of modern social research. It first provides a sociological interpretation of the origin and development of Islam in Bengal using historical and literary works on Bengal. The main contribution is based on two sample surveys conducted by Mrs. Banu in 20 villages of Bangladesh and in three areas in the metropolitan Dhaka city. Using these survey data, she gives a sociological analysis of Islamic religious beliefs and practices in contemporary Bangladesh, and more importantly, she studies the impact of the Islamic religious beliefs on the socio-economic development and political culture in present-day Bangladesh. She also shows how Islam compares with modern education in social 'transforming capacity'. This careful and rigorous work is a notable contribution to sociology of religion and helps to deepen our understanding of the interactions between religious and social changes common to many parts of the Third World.

## Clinical Homoeopathic Organotherapy

## Theory & Practice of Homoeopathy

Createspace Independent Publishing Platform There is no royal road to perfect understanding of art of curing. This book is virtually meant for giving the Homoeopaths an out-and-out knowledge about Pharmacy, Materia Medica, Repertory, Organon of Medicine and Homoeopathic Philosophy. I have incorporated Mother Tinctures, Biochemic Remedies, Indian Drugs, Specific Medicines, Group Remedies, Definite Medicines, Bedside Medicines, Drug Manuals in Materia Medica part of this book, considering the numerous practical difficulties encountered by most of the practitioners. Every possible attempt has been made for perfect choice of the similimum, amidst complicated symptomatology, from both the pharmaceutical and philosophical point of view. I will find my humble endeavour fruitful if the purpose of the Homoeopathic professions could be fulfilled. This unique book of its type has been written with great endeavour and sincerity with the purpose of acquainting our Homoeopathic Practitioners with infallible drugs. We frequently use the word 'rare' for some drugs in the vocabulary of our homoeopathic literature - though when a medicine is prescribed frequently to the patients for curing the indicated disease, it then may not be called a 'rare' medicine. However, we are accustomed to use the word 'rare' against some drugs those have definite indications. The book comprises more than 800 rare drugs with their cardinal therapeutic indications, doses and potency. All the new, old and forgotten remedies and essentials of published clinical experience have been incorporated. The busy doctor of to-day has no time for guess-work or theorizing. He simply wants to know what remedy is radically curative for his patient. I will find my endeavour fruitful and will be amply rewarded if the members of the homoeopathic profession become successful for treating most of the complicated cases by prescribing these specifically indicated drugs. Lastly, I will only be happy to receive any constructive criticism or suggestion from professors, practitioners and students about this book and the method or style of presenting a drug, so that they may be duly incorporated if found worthwhile in subsequent editions.
