Geocultural Power China's Quest to Revive the Silk Roads for the Twenty-First Century *Silk Roads* Launched in 2013, China's Belt and Road Initiative is forging connections in infrastructure, trade, energy, finance, tourism, and culture across Eurasia and Africa. This extraordinarily ambitious strategy places China at the center of a geography of overland and maritime connectivity stretching across more than sixty countries and incorporating almost two-thirds of the world's population. But what does it mean to revive the Silk Roads for the twenty-first century? Geocultural Power explores this question by considering how China is couching its strategy for building trade, foreign relations, and energy and political security in an evocative topography of history. Until now Belt and Road has been discussed as a geopolitical and geoeconomic project. This book introduces geocultural power to the analysis of international affairs. Tim Winter highlights how many countries--including Iran, Sri Lanka, Kenya, Malaysia, Indonesia, Pakistan, and others--are revisiting their histories to find points of diplomatic and cultural connection. Through the revived Silk Roads, China becomes the new author of Eurasian history and the architect of the bridge between East and West. In a diplomatic dance of forgetting, episodes of violence, invasion, and bloodshed are left behind for a language of history and heritage that crosses borders in ways that further the trade ambitions of an increasingly networked China-driven economy. The China Study The Most Comprehensive Study of Nutrition Ever Conducted and the Startling Implications for Diet, Weight Loss and Long-term Health *BenBella Books* Referred to as the "Grand Prix of epidemiology" by The New York Times, this study examines more than 350 variables of health and nutrition with surveys from 6,500 adults in more than 2,500 counties across China and Taiwan, and conclusively demonstrates the link between nutrition and heart disease, diabetes, and cancer. While revealing that proper nutrition can have a dramatic effect on reducing and reversing these ailments as well as curbing obesity, this text calls into question the practices of many of the current dietary programs, such as the Atkins diet, that are widely popular in the West. The politics of nutrition and the impact of special interest groups in the creation and dissemination of public information are also discussed. Using comparative case studies, it discusses the causes of each insurgency, analyses the trajectory and dynamics of each including attempts at resolution, and highlights the wider theories of ethno-nationalist insurgency and mobilization. Bringing together an international group of contributors, the book covers insurgencies in India, Sri Lanka, Pakistan, Nepal, and Bangladesh. It questions why ethnic sub-nationalist insurgencies occurred at particular points in time and not at others, and explores the comparative trajectories of these movements. The book goes on to discern reappearing patterns of conflict escalation/de-escalation through the method of comparative process-tracing. It argues that while identity is a necessary factor for insurgency, it is not a sufficient one. Instead, ethnic mobilization and insurgency only emerge when it is activated by tension emerging from political competition between ethnic and central state elites. These elite-led dynamics, when combined with favourable socio-economic and political conditions, make the ethnic masses primed to accept the often symbolically-rich appeals from their leaders to mobilize against the central state. Providing an important study on ethno-nationalist insurgencies in South Asia, the book will be of interest to those working in the fields of South Asian Politics, Security Studies and Ethnic Conflict. Paul Getty Museum Ms. Ludwig XIII 16 *Getty Publications* Here is a set of essays on Historia general del Piru that discuss not only the manuscript's physical components--quires and watermarks, scripts and pigments--but also its relation to other Andean manuscripts, Inca textiles, European portraits, and Spanish sources and publication procedures. Countering the Problem of Falsified and Substandard Drugs *National Academies Press* The adulteration and fraudulent manufacture of medicines is an old problem, vastly aggravated by modern manufacturing and trade. In the last decade, impotent antimicrobial drugs have compromised the treatment of many deadly diseases in poor countries. More recently, negligent production at a Massachusetts compounding pharmacy sickened hundreds of Americans. While the national drugs regulatory authority (hereafter, the regulatory authority) is responsible for the safety of a country's drug supply, no single country can entirely guarantee this today. The once common use of the term counterfeit to describe any drug that is not what it claims to be is at the heart of the argument. In a narrow, legal sense a counterfeit drug is one that infringes on a registered trademark. The lay meaning is much broader, including any drug made with intentional deceit. Some generic drug companies and civil society groups object to calling bad medicines counterfeit, seeing it as the deliberate conflation of public health and intellectual property concerns. Countering the Problem of Falsified and Substandard Drugs accepts the narrow meaning of counterfeit, and, because the nuances of trademark infringement must be dealt with by courts, case by case, the report does not discuss the problem of counterfeit medicines. We Should All Be Feminists *HarperCollins UK* A personal and powerful essay from Chimamanda Ngozi Adichie, the bestselling author of *Americanah* and *Half of a Yellow Sun*, based on her 2013 TEDx Talk of the same name. Shock Waves Managing the Impacts of Climate Change on Poverty *World Bank Publications* Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a "win-win" situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.
