Roof down and stereo up, they drive coast to coast on a mission to 'live the music'. They will sell their souls to the devil on the same crossroads as Robert Johnson, taste the loneliness of the 'Wichita Lineman' (and the fried peanut butter sandwich that finished off The King), hang out with the spirit of Johnny Cash in his own front room and, sitting on a jetty by an alligator-infested lake, sing 'Happy Birthday' to country-rock musician Gram Parsons. But first they must learn the ukulele, grow preposterous facial hair and fail to get into the Chateau Marmont with a rising popstar - and that's just day one. It's a tale of friendship tested to the limit, great melodies, perfect lyrics and noble myths. www.missingparsons.com **Aston Martin Power, Beauty and Soul** Images Publishing For nearly a century now the Aston Martin name has been synonymous with performance, style and sophistication. The new edition, the first since 1998, includes a new Foreword for the 21st century by Dr. Stanley. **Cars & Parts Brake Handbook** Hp Books Explains the workings of automobile brake systems and offers advice on the installation, testing, maintenance, and repair of brakes **Antistatic Sprays** Independently Published Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. **Goddard Space Flight Center Power Moves A Guide to Livin' the American Dream, USA Style** It Books Meet Karl Welzein, aka Captain Karl, aka @DadBoner on Twitter—the Midwest's most beautiful loser Karl Welzein is really lookin' forward to the weekend, you guys. His job is a drag and his wife kicked him out, but that's okay. She wears granny panties and is constantly dropping wads of cash at Target, and his son cries all the time. Now his "temporary" roommate, Dave, ate all the Totino's pizza rolls. Again. Karl Welzein is sick of this. So sick of this. Power Moves chronicles the hilarious decline of Karl Welzein on his journey from life as a Dockers-and-golfshirt-wearing dad to a ponytailed party maniac who spits out his life philosophies like a modern-day Charles Bukowski (if he preferred to get drunk at Applebee's). A middle-aged Michigan native, Karl may be overweight, prone to questionable fashion and culinary choices, oblivious to his drinking problem, a poor excuse for an employee, obsessed with the restroom, and a terrible husband, father, and friend . . . but in his heart he means well. He's just like a lot of us—he loves the USA, Guy Fieri, bold flavors, Bob Seger, and thinking he looks jacked in a tight tee and Maui Jim sunglasses. Karl is an everyman and like no other man on the planet all at once. Inspired by the Twitter feed @DadBoner, Karl finally tells his full story. He shares his wisdom on fitness (1. Look at a pic of Stone Cold Steve Austin. 2. Do 'shups 'til you look like Stone Cold. 3. Cut off your sleeves), diet (Eat only the filling of the Taco Bell Beefy Melts for maximum flavor and low-carb health), fashion (Wearin' boots with jean shorts says "I like to keep cool, but I'm ready if the action gets hot"), work life (If you don't have a job that makes you want to kill yourself, you don't deserve to drink until you want to die), and the bliss of the perfect weekend (beers, brats, and babes' chest beefers). But above all, this is a story about America—the real red, white, and blue America of today. Welcome to Karl's world. Reading this book is the ultimate Power Move. **Radio Service Bulletin Mr Le Mans Tom Kristensen** Evro Publishing Limited Between 1997 and 2014, Tom Kristensen won the world's toughest motor race, the Le Mans 24 Hours, a record nine times and finished on the podium on five more occasions. Every time his car made it to the finish, in fact, he was in the top three. It is no wonder that this great sports car driver is known as 'Mr Le Mans' to motorsport fans around the world. Now retired from racing, Kristensen shares in this book his deepest personal reflections and insights from inside and outside the cockpit. He looks back on more than 30 years spent striving for perfection in racing and tells of the battles and setbacks that sometimes seemed impossible to overcome, including a terrible accident in 2007. Climbing the racing ladder, from karting into Formula 3 single-seaters, including championship titles in Germany (1991) and Japan (1993), then Formula 3000 and a Formula 1 testing role with Tyrrell. Winning as an underdog on his first visit to Le Mans, in 1997 driving an elderly Joest-run privateer Porsche in which he impressed all onlookers with a night-time charge to vanquish Porsche's factory-entered favourite. His second Le Mans victory came in 2000 on his maiden drive for Audi in the R8, a car that was to become all-conquering. Kristensen won the next five editions of Le Mans, four times with Audi and once with Bentley (in 2003), his last victory in this sequence taking him past Jacky Ickx's previous record at the Circuit de la Sarthe. His eighth win came in one of the all-time classic contests at Le Mans, in 2008, a rollercoaster of a race in which his ageing diesel-powered Audi was never expected to beat the fancied works Peugeots. One more victory with Audi in 2013 sealed his reputation as a true legend of Le Mans. His story includes exploits at other racetracks all over the world, none more prolific than Sebring, home of America's long-established classic endurance race that Kristensen won six times. Personal reflections together with contributions from notable observers -- including English journalists Gary Watkins and Charles Bradley -- complete a truly rounded portrait of the man and his achievements. Voted 'Sports Book of the Year' when originally published in Kristensen's native Denmark, this thoughtful memoir is now available in English. **Adaptive Business Intelligence** Springer Science & Business Media Adaptive business intelligence systems combine prediction and optimization techniques to assist decision makers in complex, rapidly changing environments. These systems address fundamental questions: What is likely to happen in the future? What is the best course of action? Adaptive Business Intelligence explores elements of data mining, predictive modeling, forecasting, optimization, and adaptability. The book explains the application of numerous prediction and optimization techniques, and shows how these concepts can be used to develop adaptive systems. Coverage includes linear regression, time-series forecasting, decision trees and tables, artificial neural networks, genetic programming, fuzzy systems, genetic algorithms, simulated annealing, tabu search, ant systems, and agent-based modeling. **Strategic Planning for Public Relations** Routledge First published in 2004. Routledge is an imprint of Taylor & Francis, an informa company. **Fault Lines How Hidden Fractures Still Threaten the World Economy** Princeton University Press From an economist who warned of the global financial crisis, a new warning about the continuing peril to the world economy Raghuram Rajan was one of the few economists who warned of the global financial crisis before it hit. Now, as the world struggles to recover, it's tempting to blame what happened on just a few greedy bankers who took irrational risks and left the rest of us to foot the bill. In Fault Lines, Rajan argues that serious flaws in the economy are also to blame, and warns that a potentially more devastating crisis awaits us if they aren't fixed. Rajan shows how the individual choices that collectively brought about the economic meltdown—made by bankers, government officials, and ordinary homeowners—were rational responses to a flawed global financial order in which the incentives to take on risk are incredibly out of step with the dangers those risks pose. He traces the deepening fault lines in a world overly dependent on the indebted American consumer to power global economic growth and stave off global downturns. He exposes a system where America's growing inequality and thin social safety net create tremendous political pressure to encourage easy credit and keep job creation robust, no matter what the consequences to the economy's long-term health; and where the U.S. financial sector, with its skewed incentives, is the critical but unstable link between an overstimulated America and an underconsuming world. In Fault Lines, Rajan demonstrates how unequal access to education and health care in the United States puts us all in deeper financial peril, even as the economic choices of countries like Germany, Japan, and China place an undue burden on America to get its policies right. He outlines the hard choices we need to make to ensure a more stable world economy and restore lasting prosperity. **Electric and Hybrid Cars A History, 2d ed.** McFarland This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered. **Unsafe at Any Speed Automotive Heating & Air Conditioning** Haynes Manuals N. Dubbed "Cherries" by their more seasoned peers, these newbies suddenly found themselves thrust into the middle of a terrible nightmare - literally forced to become men overnight. On-the-job-training is intense, however, most of these teenagers were hardly ready to absorb the harsh mental, emotional, and physical stress of war. When coming under enemy fire for the first time and witnessing death first-hand, a life changing transition begins...one that can't be reversed. The author is an excellent story teller, readers testify that they are right there with the characters, joining them in their quest for survival, sharing the fear, awe, drama, and sorrow, witnessing bravery and sometimes, even laughing at their humor. It's a story that is hard to put down. When soldiers return home from war, all are different - changed for life. "Cherries" tells it like it is and when finished, readers will better understand what these young men had to endure, and why change is imminent. **Automotive Electrics and Electronics** 3rd Edition.
