It serves as a resource to related nursing specialties, e.g. critical care, emergency or peri-anesthesia, and to radiologic technologists and physician assistants. The book could be used as one resource for studying for radiologic nursing certification. The textbook is subdivided into five sections that address advanced practice and leadership roles, clinical patient care topics, safety topics, including legal considerations, e.g. infection prevention and equipment. discharge and follow-up. Nurses assess, monitor, administer sedation/other medications and respond to emergencies. They serve as educators, researchers, and resource personnel to the radiology department and in many instances, to the entire facility. Radiology nurses are real leaders. In order to keep up-to-date on new developments, nurses need new literature to support their clinical expertise and leadership.
