ANALYSIS AND DETERMINANTS

MILITARY PRODUCTION AND INNOVATION IN SPAIN

Psychology Press Military Production and Innovation in Spain extends the scope beyond the traditional analysis of arms producers to include components and sub-systems manufacturers. It combines a description of the changes experienced by Spanish military production with an analysis of its deeply-rooted structural characteristics. The book provides an in-depth exploration of the Spanish military-related industry, its links with the rest of the economy and its potential role as a technological engine for the Spanish economy.

PURE SPACE (SPANISH EDITION)

EXPANDING THE PUBLIC SPHERE THROUGH PUBLIC SPACE TRANSFORMATIONS IN LATIN AMERICAN SPONTANEOUS SETTLEMENTS

Actar D, Inc. This book may seem a simple accumulation of twenty-one public space projects in eight Latin American cities. On closer inspection, the presentation of project descriptions, photographs, and annotated drawings reflects a concern to analytically explain the operative aspects at work. The publication is not intended to serve only as a catalogue, guide, or manual on how to produce public space in spontaneous settlements. Rather, it goes beyond the aims of an index of best practices. It is intended, instead, as an empirical base for a critical and theoretical engagement with the problematic of development, social inclusion, public investment, (in)formal settlement, civil society and the public sphere. The publication achieves its final function at this third level, by providing a compelling argument to expand the agency of architects and urban designers and creatively find ways of justifying, financing, and building public spaces in communities —spaces that have a catalytic effectiveness in achieving significant urban and social transformation. This book was awarded by a Graham Foundation Grant and CAF Development Bank of Latin America. **FEATURED CASE STUDIES:** CONSERVATION 72 Linear parks along the Estero Salado | Guayaquil, Ecuador 80 National Park Babilonia and Chapu Manguera | Rio de Janeiro, Brazil 88 Urban agriculture along the Rimac River | Lima, Peru **WASTE MANAGEMENT** 96 Moravia Ecological Park | Medellin, Colombia 104 Plaza La Cruz, La Palomera | Caracas, Venezuela **RISKMANAGEMENT** 112 El Guasmo Beach, floodable park | Guayaquil, Ecuador 120 Safety plazas in Santa Maria El Triunfo | Lima, Peru 128 Recovery of the Juan Bobo Creek | Medellin, Colombia **INFRASTRUCTURE** 136 Northeast metro-cable parks Comuna 1, La Popular | Medellin, Colombia 144 Barrio Las Independencias escalators and walkways | Medellin, Colombia 152 Funicular in Dona Marta | Rio de Janeiro, Brazil 160 Complexo do Alemão | Rio de Janeiro, Brazil 168 Ecotecnica Urbana Miravalle | Mexico City, Mexico **PAVEMENT, PATHS AND THE SPACE SURROUNDING BUILDINGS** 176 Pavement, paths and stairs Cerro Santo Doming and Cerro Toro | Valparaiso, Chile 184 Cerro Santa Ana urban rehabilitation | Guayaquil, Ecuador 192 Fernando Botero Library | Medellin, Colombia 200 Moravia Cultural Center | Medellin, Colombia 208 Espaço Criança and community programs | Rio de Janeiro, Brazil 216 Plaza in Villa Tranquila | Buenos Aires, Argentina **ACTIVITY** 224 Casa Kolacho Comuna 13 | Medellin, Colombia 232 AfroReggae Cultural Center | Rio de Janeiro, Brazil 240 Alto Per. | Lima, Peru 248 El Calvario Puertas Abiertas | Caracas, Venezuela

DEMOCRATIC SPAIN

RESHAPING EXTERNAL RELATIONS IN A CHANGING WORLD

Routledge Since the death of General Franco in 1975, Spain has emerged from relative isolation to play an active role in international affairs. Membership of the European Union and Nato have been keys to Spain's new prominence, although the country has also tried to build on its traditional "special relationships" with Latin America and the Arab world. This is the first thorough study of democratic Spain's re-emergence on the international scene. By focusing on the relationship between external relations and domestic policy the book makes an important contribution to the literature on democratisation, as well as showing how Spanish foreign policy evolved between the mid-1970s and mid-1990s. While the book focuses on democratic Spain, its revisionist view of democratic transitions is of more general relevance. Democratization is seen as an integral process involving related, though not simultaneous changes in domestic policy and external relations. Only with the transformation of her external relations did Spain's new democracy finally become consolidated. This book will be required reading for students of Spanish politics and will also be useful to those interested in the process of democratization.

BIBLIOGRAPHY OF LAW AND ECONOMICS

Springer Science & Business Media Law and economics can be considered as the most exciting development in legal scholarship in recent decades. This volume is the first all-encompassing bibliography in this area. It lists approximately 7000 publications, covering the whole area of law and economics, including 'old' law and economics (topics such as antitrust law, labor law, tax law, social security, economic regulation, etc.) as well as 'new' law and economics with such topics as tort law, contract law, family law, procedure, criminal law, etc.). The volume also includes the literature on the philosophical foundations and the fundamental concepts of the approach. Part Two gives a special survey of law and economics publications in Europe, written in other languages than English. The Bibliography of Law and Economics is an invaluable reference work for students, scholars, lawyers,

economists and other people interested in this field.

ECONOMICS OF INNOVATION: THE CASE OF FOOD INDUSTRY

Physica With only few exceptions, theoretical and empirical literature on innovation privileges the analysis of determinants, the effects on firms' market shares and on market structures, mainly with reference to high-tech industries whereas it has generally neglected the food industry. In this book, it is shown that this underevaluation originates from a poor analysis of the characteristics of innovation in this sector and of the importance that this aspect has for the entire food chain. Both, technological changes and product innovation represent relevant competitive strategies for food firms. This book provides new analyses of nature, determinants and consequences of innovation in the food industries.

CEO BRANDING

THEORY AND PRACTICE

Routledge CEO Branding advances our understanding of the importance and impact that CEOs have on companies. In recent years, there has been a growing body of interdisciplinary literature on this powerful aspect of branding, and Fetscherin has invited a leading panel of international scholars and practitioners to contribute original chapters in their area of expertise. The book introduces the concept of the CEO as a brand, and outlines the "4Ps" of this branding mix - the CEO (person), personality, prestige (reputation), and performance. It discusses the CEO branding process, and demonstrates the many ways in which this 'human brand' affects the company in financial terms (such as performance, profit, and stock returns), as well as non-financial terms (reputation, trust, and firm strategy). The book also includes 'lessons learned' and many examples that illustrate how companies can measure and manage the CEO brand. This comprehensive, authoritative volume will give students, researchers, marketing and communication managers, and CEOs themselves a thorough understanding of all aspects of the CEO brand. A must read for any CEO who is serious about developing, managing and measuring their own

brand. For more information, visit www.ceobranding.org

THE HOUSE OF ROTHSCHILD IN SPAIN, 1812-1941

Routledge Amongst the serried ranks of capitalists who drove European industrialisation in the nineteenth century, the Rothschilds were amongst the most dynamic and the most successful. Establishing businesses in Germany, Britain, France, Austria, and Italy the family soon became leading financiers, bankrolling a host of private and government businesses ventures. In so doing they played a major role in fuelling economic and industrial development across Europe, providing capital for major projects, particularly in the mining and railway sectors. Nowhere was this more apparent than in Spain, where for more than a century the House of Rothschild was one of the primary motors of Spanish economic development. Yet, despite the undoubted importance of the Rothschild's role, questions still remain regarding the actual impact of these financial activities and the effect they had on financial sectors, companies and Spanish markets. It is to such questions that this book turns its attention, utilising a host of archive sources in Britain, France and Spain to fully analyse the investments and financial activities carried out by the Rothschild House in Spain during the nineteenth and early twentieth centuries. In so doing the book tackles a variety of interrelated issues: Firstly, fixing the period when the main capital entries sprung from the initiatives taken by the Rothschild family, how consequential they really were, and the sectors they affected. Secondly, quantifying the importance of these investments and financial activities and the weight they had on financial sectors, companies and Spanish markets, as well as in foreign investment in each period. Thirdly, outlining the steps followed and means used by the Rothschild House in order to achieve the success in each of their businesses. Finally, analysing the consequences of this phenomenon in the actual growth of Spanish contemporary economy, both in a general and in a partial scale. By exploring these crucial questions, not only do we learn much more about the working of one of the leading financial institutions and the development of the Spanish economy, but a greater understanding of the broader impact of international finance and the flow of capital in the nineteenth century is achieved.

STRATEGIC ALLIANCES FOR VALUE CREATION

IAP Strategic Alliances for Value Creation is a volume in the book series Research in Strategic Alliances that will focus on providing a robust and comprehensive forum for new scholarship in the field of strategic alliances. In particular, the books in the series will cover new views of interdisciplinary theoretical frameworks and models, significant practical problems of alliance organization and management, and emerging areas of inquiry. The series will also include comprehensive empirical studies of selected segments of business, economic, industrial, government, and non-profit activities with wide prevalence of strategic alliances. Through the ongoing release of focused topical titles, this book series will seek to disseminate theoretical insights and practical management information that will enable interested professionals to gain a rigorous and comprehensive understanding of the field of strategic alliances. Strategic Alliances for Value Creation contains contributions by

leading scholars in the field of strategic alliance research. The 14 chapters in this volume cover a number of significant topics that encompass value creation through strategic alliances in recent times. The chapters cover both the broader topics, such as multi-partner alliances, technology parks, intellectual property rights, knowledge management and culture, portfolio theory, learning in alliances, and open innovation, and the more focused problems of transparency in interfirm accounting, local partner perspective of management control, knowledge in intra-district networks, and alliance partners for entrepreneurial firms. The chapters include empirical as well as conceptual treatments of the selected topics, and collectively present a wide-ranging review of the noteworthy areas of research on employing strategic alliances for value creation.

ENERGY ABSTRACTS FOR POLICY ANALYSIS

ANALYSIS OF SCIENCE, TECHNOLOGY, AND INNOVATION IN EMERGING ECONOMIES

Springer This book outlines a number of different perspectives on the relationship between science, technology, and innovation in emerging economies. In it, the authors explore the aforementioned relationship as a pillar of economic development, driving growth in emerging economies. Employing a collaborative and interdisciplinary approach, the authors work to determine the main related factors and outcomes of the relationship between science, technology, and innovation, ultimately seeking to guide public policies to enhance the welfare of the population of an emerging economy.

THE ECONOMIC HISTORY OF NUCLEAR ENERGY IN SPAIN

GOVERNANCE, BUSINESS AND FINANCE

Springer This book analyses the economic history of the nuclear program in Spain, from its inception in the 1950s to the nuclear moratorium in the early 1980s, and investigates the economic, financial and business origins of atomic energy in Spain. The actual dimension of the Spanish nuclear sector, which exceeded the relative economic and political clout of the country at the time, reflects the combination of domestic and foreign interests. Each contribution inserts the Spanish case within the international development of nuclear energy, but also shows how the Spanish

nuclear program came about, how it was financed, and who the main architects and beneficiaries at the industrial, financial, commercial and banking levels were; all without losing sight of the energy policy aspects such as energy mix and energy security. The volume provides useful analysis and sources for a variety of core fields across the social sciences including economic history of post-war Europe, industrial and energy policy, international relations and history of technology.

THE EMERGING INDUSTRIAL STRUCTURE OF THE WIDER EUROPE

Routledge The latest wave of European Union expansion has brought many central and Eastern European countries into the fold. Unlike previous enlargements however, the latest new members are also undergoing radical economic reform as they reintegrate into international economy. This book reviews the changing industrial architecture of the new wider Europe from a "network" perspective, highlighting the importance of the linkages that develop between firms and governments in the new entrants and the EU. It does so on the basis of a series of case studies covering countries, sectors, and firms as well as providing an analysis of the underlying dynamics of production and policy integration. The impressive group of authors go beyond tradition analyses by adopting an interdisciplinary approach drawing on the insights of economics and politics. As such, the book will appeal to students of the EU and enlargement, as well as those with an interest in foreign investment and transition economies.

INDUSTRY AND WORK IN CONTEMPORARY CAPITALISM

GLOBAL MODELS, LOCAL LIVES?

Routledge Throughout history and in every geographical location, the rise and fall of industry, which impact the fate of large populations, are tied to the development and cultural entanglement of particular models that are articulated with political power. Models are understood as knowledge devices - expert, theoretical, practical and commonsense - that are embedded in cultural and social environments and designed through struggles at various scales. This book results from the collaboration of an interdisciplinary team bringing together specialists in

anthropology, geography, sociology, economics, political science, mathematics and engineering around the theme of 'Models and their Effects on Development Paths'. Based on empirical research conducted on the heavy industries, *Industry and Work in Contemporary Capitalism* addresses how models that inform the organization of work and production and are created by powerful actors may diverge from, overlap with, or contradict the models articulated by less powerful actors on the ground, and how they are connected across material and cultural spaces. Careful observation of industrial work and production as they unfold in and across specific localities and affects people's livelihoods is complemented by analysis of how models circulate, through which channels of power, which institutional entities, which political connections. This volume explores an extensive theoretical terrain and a number of empirical cases that show, from different perspectives, how ideas about the economy, about work and industry, materialize in specific practices and interventions that affect people's livelihoods.

BANKING ON PRIVILEGE

THE POLITICS OF SPANISH FINANCIAL REFORM

Cornell University Press 'This is a remarkable book, engrossing and exceptionally well organized. The argument is clear, elegant, and subtle. My guess is that Banking on Privilege will quickly earn a place as one of the standards of comparative political economy.'—Peter McDonough, Arizona State University 'This wonderfully researched study of the mutual accommodation between private and central bankers in Spain offers a compelling alternative to state and market-driven conceptions of financial regulation and reform. The author's careful theoretical crafting and mastery of historical detail assures this book a place beside the works by Zysman, Loriaux, Woo, and a few others on a narrow shelf of essential texts about the comparative political economy of financial systems. No serious observer of financial and monetary reform in Europe can afford to ignore this impressive book.'—Mauro F. Guillen, The Wharton School, University of Pennsylvania 'This is a thoroughly researched and meticulously argued piece of scholarship that contributes much substance to our knowledge of finance and financial reform in other countries and brings many provocative ideas to theoretical debate.'—Michael Loriaux, Northwestern University

COMPANIES AND ENTREPRENEURS IN THE HISTORY OF SPAIN

CENTURIES LONG EVOLUTION IN BUSINESS SINCE THE 15TH CENTURY

Springer Nature This book analyses the economic history of the company and entrepreneurship in Spain from the 15th century to the present. It evaluates the economic theory, the formation of the figure of the entrepreneur, as well as the structure of the companies. This exploration of the businessmen in Spain over several centuries is something that has not been done until now. Joining the great Spanish historiographical debate about the existence or not of entrepreneurship, the book brings together research in very different historical contexts and junctures. It presents a selection of cases of companies and entrepreneurs from Spain, from different sectors, regions and periods, from boom to crisis, from the wine businessman to the railway sector, from private banking to the pioneers of the Spanish travel agency business. It will be of interest to academics and students in economic history, business and management history, as well as researchers in entrepreneurship & small business management.

AN APPLICATION TO SPANISH FIRMS

INNOVATION, AGGLOMERATION AND REGIONAL COMPETITION

Edward Elgar Publishing The rise of globalization has triggered a fundamental rethinking about the role of regions in economic development policy. In this important new book, Karlsson, Johansson and Stough assemble a cast of leading international scholars to unravel the new role for regions and local economic development policy to harness the possibilities unleashed by the forces of globalization. This book contains important new insights and ideas that will be welcomed by both scholars and policymakers. David B. Audretsch, Indiana University, Bloomington, US and WHU, Germany This book provides a state-of-the-art overview of current research on regional competition and co-operation. Developing our current understanding of the new role of regions and their behaviour, this book addresses questions such as: How and why do regions compete? How does competition between border regions operate? Which regions are successful and which regions fail? What are the implications of regional competition in terms of resource allocation, the location of economic activities and the distribution of incomes? The book illuminates a number of critical theoretical and empirical issues relating to the competitive and cooperative nature of regions, as well as highlighting a number of new case studies from a variety of countries. The book will be a useful enhancement to undergraduate and post-graduate courses in economics, economic geography, regional science, regional planning, business administration, and international and industrial management. It will also be an invaluable guidance tool for researchers, consultants and policy makers in international organizations such as the EU, the World Bank and the OECD.

Manchester University Press

FINANCIAL COOPERATIVES AND LOCAL DEVELOPMENT

Routledge This book examines the opportunities opened up for financial cooperatives by the recent financial crisis, and explores the role of these institutions in promoting and sustaining local development. The global financial crisis has not only shown the limits of the mainstream theory of markets and rational expectations, but has also generated a great deal of disillusionment with the banking system and underlined the importance of a healthy society for the welfare of the individual. Consequently, new and innovative ways of providing finance are needed, especially for strengthening the development of local societies.
