---

---

---

**TAX FREE TRADE ZONES OF THE WORLD AND IN THE UNITED STATES**

---

**Edward Elgar Publishing** *This definitive and comprehensive book, with contributions from world-renowned foreign trade zone expert, the late Walter Diamond, provides an up-to-date guide to the free trade zones and subzones in the United States and around the world. Economic reasons for using free trade zones are explored, encompassing the benefits gained and profits earned, such as exemptions, reductions from customs duties, proximity to foreign export markets, and low-cost processing and packaging of goods designed to lower duties or freight charges. Practical, hard-to-locate data and contact details are provided on every free trade zone in the US, as well as information on the history, growth and types of users in each zone, storage space, transportation access, the cost of user facilities, utilities, communications, labor availability, warehousing features, and enterprise zones within the free trade zone. Tax Free Trade Zones of the World and in the United States will be an invaluable reference tool for a wide-ranging professional audience including: international, multinational and business law firms, tax advisory and finance firms, international sales and marketing executives, import, export and shipping companies, customs brokers and insurance agencies. In addition, it will prove a useful, practical resource for law students focusing on international business and international trade.*

**BATTERIES IN THE NORDICS: CHANGING FOR CIRCULARITY**

---

**Nordic Council of Ministers** Available online: <https://pub.norden.org/temanord2022-523/> The overall aim of this project is to promote the Nordic countries as a forerunner region in demanding and using sustainable design of batteries for consumer electronics and the transport sector, and to identify key opportunities, barriers and challenges in the transition towards a more sustainable use of battery technologies. The aesthetics of the design should meet with the overall sustainability: high quality, durability and smart assembly for refurbishing. The project is funded by the Nordic Working Group for Circular Economy (NCE) under the Nordic Council of Ministers. The project has been carried out by Viegand Maagøe A/S (Denmark) and IVL Swedish Environmental Research Institute (Sweden) in the period 20 October 2020 to 31 December 2021. A reference group with representatives from the Nordics has been established, who provided valuable input to the study.

**THE MARKET MAKERS**

---

---

**CREATING MASS MARKETS FOR CONSUMER DURABLES IN INTER-WAR BRITAIN**

---

**Oxford University Press** During the twentieth century "affluence" (both at the level of the individual household and that of society as a whole) became intimately linked with access to a range of prestige consumer durables. The Market Makers charts the inter-war origins of a process that would eventually transform these features of modern life from being 'luxuries' to "necessities" for most British families. Peter Scott examines how producers and retailers succeeded in creating "mass" (though not universal) market for new suites of furniture, radios, modern housing, and some electrical and gas appliances, while also exploring why some other goods, such as refrigerators, telephones, and automobiles, failed to reach the mass market in Britain before the 1950s. Creating mass markets presented a formidable challenge for manufacturers and retailers. Consumer durables required large markets. Most involved significant research and development costs. Some, such as the telephone, radio, and car, were dependent on complementary investments in infrastructure. All required intensive marketing--usually including expensive advertising in national newspapers and magazines, while some also needed mass production methods (and output volumes) to make them affordable to a mass market. This study charts the pioneering efforts of entrepreneurs (many of whom, though once household names, are now largely forgotten) to provide consumer durables at a price affordable to a mass market and to persuade a sometimes reluctant public to embrace the new products and the consumer credit that their purchase required. In doing so, Scott shows that, contrary to much received wisdom, there was a 'consumer durables revolution' in inter-war Britain--at least for certain highly prioritized goods.

---

**THE VACUUM CLEANER**

---

---

## A HISTORY

---

**McFarland** House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

## MERCHANDISE MANUAL SERIES

---

---

## **AN ECONOMIC HISTORY OF MODERN SWEDEN**

---

**Taylor & Francis** *The book is based on a rich and detailed quantitative material from research over the past decades with consecutive time series over production volumes, employment, productivity, investments etc. for sectors and branches covering the whole economy, even including estimates of non-marketed domestic work. It is also based on a broad literature from Swedish historiography with details on the individual level of firms, innovators and entrepreneurs. Focus is upon the interplay between technological, economic and social change where a number of broad themes are treated with a general interest to historians or economists, e.g. the role of social change and domestic markets versus international specialisation and exports as dynamic factors in Swedish economic growth.*
