## The Experience Economy

### Work is Theatre & Every Business a Stage

[Harvard Business Press](#) You are what you charge for. And if you're competing solely on the basis of price, then you've been commoditized, offering little or no true differentiation. What would your customers really value? Better yet, for what would they pay a premium? Experiences. The curtain is about to rise, say Pine Gilmore, on the Experience Economy, a new economic era in which every business is a stage, and companies must design memorable events for which they charge admission. With The Experience Economy, Pine Gilmore explore how successful companies-using goods as props and services as the stage-create experiences that engage customers in an inherently personal way. Why does a cup of coffee cost more at a trendy cafe than it does at the corner diner or when brewed at home? It's the value that the experience holds for the individual that determines the worth of the offering and the work of the business. From online communities to airport parking, the authors draw from a rich and varied mix of examples that showcase businesses in the midst of creating engaging experiences for both consumers and corporate customers. The Experience Economy marks the debut of an insightful, highly original, and yet eminently practical approach for companies to script and stage compelling experiences. In doing so, all workers become actors, intentionally creating specific effects for their customers. And it's the experiences they stage that create memorable-and lasting-impressions that ultimately create transformations within individuals. Make no mistake, say Pine Gilmore: goods and services are no longer enough. Experiences are the foundation for future economic growth, and The Experience Economy is the playbook from which managers can begin to direct new performances.

## The Invention of the White Race

### The Origin of Racial Oppression

**Verso Books** When the first Africans arrived in Virginia in 1619, there were no 'white' people there; nor, according to colonial records, would there be for another sixty years. Historical debate about the origin of racial slavery has focused on the status of the Negro in seventeenth-century Virginia and Maryland. However, as Theodore W. Allen argues in this magisterial work, what needs to be studied is the transformation of English, Scottish, Irish and other European colonists from their various statuses as servants, tenants, planters or merchants into a single new all-inclusive status: that of whites. This is the key to the paradox of American history, of a democracy resting on race assumptions. Volume One of this two-volume work attempts to escape the 'white blind spot' which has distorted consecutive studies of the issue. It does so by looking in the mirror of Irish history for a definition of racial oppression and for an explanation of that phenomenon in terms of social control, free from the absurdities of classification by skin color. Compelling analogies are presented between the history of Anglo-Irish and British rule in Ireland and American White Supremacist oppression of Indians and African-Americans. But the relativity of race is shown in the sea change it entailed, whereby emigrating Irish haters of racial oppression were transformed into White Americans who defended it. The reasons for the differing outcomes of Catholic Emancipation and Negro Emancipation are considered and occasion is made to demonstrate Allen's distinction between racial and national oppression.

## Slavery and the British Country House

In 2007 English Heritage commissioned initial research into links with transatlantic slavery or its abolition amongst families who owned properties now in its care. This was part of the commitment by English Heritage to commemorate the bicentenary of the abolition of the British transatlantic slave trade with work that would make a real difference to our understanding of the historic environment in the longer term. The research findings and those of other scholars and heritage practitioners were presented at the 'Slavery and the British Country House' conference which brought together academics, heritage professionals, country house owners and community researchers from across Britain to explore how country houses might be reconsidered in the light of their slavery linkages and how such links have been and might be presented to visitors. Since then the conference papers have been updated and reworked into a cutting edge volume which represents the most current and comprehensive consideration of slavery and the British country house as yet undertaken.
