Research Handbook on EU Data Protection Law

Edward Elgar Publishing *Bringing together leading European scholars, this thought-provoking Research Handbook provides a state-of-the-art overview of the scope of research and current thinking in the area of European data protection. Offering critical insights on prominent strands of research, it examines key challenges and potential solutions in the field. Chapters explore the fundamental right to personal data protection, government-to-business data sharing, data protection as performance-based regulation, privacy and marketing in data-driven business models, data protection and judicial automation, and the role of consent in an algorithmic society.*

The Closing of the Net

John Wiley & Sons *This inspirational book provides the backstory to current attempts by states and corporations to control the Internet. It explains key issues such as privacy, net neutrality and copyright in a way that is accessible to non-experts, as well as providing a clear, authoritative context for academic study. The Closing of the Net explains: •Why apps are never 'free', and how data profiling got into politics •How the entertainment industries went head-to-head with Internet companies over online copyright •Why we got the GDPR (General Data Protection Regulation) and why Europe has stronger privacy laws than the US •How post-Snowden surveillance politics is embedded in data retention law •Why net neutrality matters •How cloud service Megaupload was brought down Monica Horten's compelling account of these issues concludes with an outline of the risks we face in*

the future if monitoring and blocking of the Internet becomes the norm. And the results are chilling. This book is a must-read for all followers of cyber-policy, and is suitable for courses addressing digital media and society, communications policy, Internet and copyright law.

The Foundations of EU Data Protection Law

Oxford University Press *A timely and innovative examination of the EU data protection regime, this book challenges existing assumptions about data protection and expounds a clear vision for the future of this crucial and contentious area of law.*

Big Data in Context

Legal, Social and Technological Insights

Springer *This book is open access under a CC BY 4.0 license. This book sheds new light on a selection of big data scenarios from an interdisciplinary perspective. It features legal, sociological and economic approaches to fundamental big data topics such as privacy, data quality and the ECJ's Safe Harbor decision on the one hand, and practical applications such as smart cars, wearables and web tracking on the other. Addressing the interests of researchers and practitioners alike, it provides a comprehensive overview of and introduction to the emerging challenges regarding big data.All contributions are based on papers submitted in connection with ABIDA (Assessing Big Data), an interdisciplinary research project exploring the societal aspects of big data and funded by the German Federal Ministry of Education and Research.This volume was produced as a part of the ABIDA project (Assessing Big Data, 01IS15016A-F). ABIDA is a four-year collaborative project funded by the Federal Ministry of Education and Research. However the views and opinions expressed in this book reflect only the authors' point of view and not necessarily those of all members of the ABIDA project or the Federal Ministry of Education and Research.*

Handbook of Research on Cyber Law, Data Protection, and Privacy

IGI Global *The advancement of information and communication technology has led to a multi-dimensional impact in the areas of law, regulation, and governance. Many countries have declared data protection a fundamental right and established reforms of data protection law aimed at modernizing the global regulatory framework. Due to*

these advancements in policy, the legal domain has to face many challenges at a rapid pace making it essential to study and discuss policies and laws that regulate and monitor these activities and anticipate new laws that should be implemented in order to protect users. The Handbook of Research on Cyber Law, Data Protection, and Privacy focuses acutely on the complex relationships of technology and law both in terms of substantive legal responses to legal, social, and ethical issues arising in connection with growing public engagement with technology and the procedural impacts and transformative potential of technology on traditional and emerging forms of dispute resolution. Covering a range of topics such as artificial intelligence, data protection, and social media, this major reference work is ideal for government officials, policymakers, industry professionals, academicians, scholars, researchers, practitioners, instructors, and students.

The Comparative Law Yearbook of International Business:

Kluwer Law International B.V. In this thirty-eighth volume of the Comparative Law Yearbook of International Business, once again practitioners and experts in a variety of legal fields examine issues from national and regional perspectives. Authors from Germany, Japan, Nigeria, and Poland deal with issues relating to data protection and privacy. Investment and infrastructure topics are examined by authors from Brazil, Colombia, Greece, and the United States. Subjects ranging from corporate responsibility, patent infringement litigation, and credit portfolio transfers to medical and family leave, food and beverage product representations, and distribution agreements are treated by authors from Belgium, Hungary, Ireland, Japan, Latvia, and the United States.

Personal Data in Competition, Consumer Protection and Intellectual Property Law

Towards a Holistic Approach?

Springer This book analyses the legal approach to personal data taken by different fields of law. An increasing number of business models in the digital economy rely on personal data as a key input. In exchange for sharing their data, online users benefit from personalized and innovative services. But companies' collection and use of personal data raise questions about privacy and fundamental rights. Moreover, given the substantial commercial and strategic value of personal data, their accumulation, control and use may raise competition concerns and negatively affect consumers. To establish a legal framework that ensures an adequate level of protection of personal

data while at the same time providing an open and level playing field for businesses to develop innovative data-based services is a challenging task.With this objective in mind and against the background of the uniform rules set by the EU General Data Protection Regulation, the contributions to this book examine the significance and legal treatment of personal data in competition law, consumer protection law, general civil law and intellectual property law. Instead of providing an isolated analysis of the different areas of law, the book focuses on both synergies and tensions between the different legal fields, exploring potential ways to develop an integrated legal approach to personal data.

Regulating New Technologies in Uncertain Times

Springer *This book deals with questions of democracy and governance relating to new technologies. The deployment and application of new technologies is often accompanied with uncertainty as to their long-term (un)intended impacts. New technologies also raise questions about the limits of the law as the line between harmful and beneficial effects is often difficult to draw. The volume explores overarching concepts on how to regulate new technologies and their implications in a diverse and constantly changing society, as well as the way in which regulation can address differing, and sometimes conflicting, societal objectives, such as public health and the protection of privacy. Contributions focus on a broad range of issues such as Citizen Science, Smart Cities, big data, and health care, but also on the role of market regulation for new technologies.The book will serve as a useful research tool for scholars and practitioners interested in the latest developments in the field of technology regulation. Leonie Reins is Assistant Professor at the Tilburg Institute for Law, Technology, and Society (TILT) in The Netherlands.*

Privacy and Data Protection Seals

Springer *The book presents timely and needed contributions on privacy and data protection seals as seen from general, legal, policy, economic, technological, and societal perspectives. It covers data protection certification in the EU (i.e., the possibilities, actors and building blocks); the Schleswig-Holstein Data Protection Seal; the French Privacy Seal Scheme; privacy seals in the USA, Europe, Japan, Canada, India and Australia; controversies, challenges and lessons for privacy seals; the potential for privacy seals in emerging technologies; and an economic analysis. This book is particularly relevant in the EU context, given the General Data Protection Regulation (GDPR) impetus to data protection certification mechanisms and the dedication of specific provisions to certification. Its coverage of practices in jurisdictions outside the EU also makes it relevant globally. This book will appeal to European legislators and policy-makers, privacy and data protection practitioners, certification bodies, international organisations, and academics. Rowena Rodrigues is a Senior Research Analyst with Trilateral Research Ltd. in London and Vagelis Papakonstantinou is a Senior Researcher at the Vrije Universiteit Brussel in Brussels.*

Handbook of Research on Cyberchondria, Health Literacy, and the Role of Media in Society's Perception of Medical Information

IGI Global *Cyberchondria is characterized by a pattern of excessive health-based search behaviors that are likely to increase health anxiety or distress, heightened by ever-increasing access to and normalization of technology use and the internet specifically. The internet can be a source of valuable medical information and is an efficient vehicle for awareness-raising and dissemination; however, it can increase anxiety in audiences without medical knowledge or training and can pose a challenge to the traditional gatekeepers of medical knowledge and expertise. Technological advances are accelerating rapidly; however, concomitant to this acceleration, an epidemic of online mis- and dis-information that has the capacity to negatively impact general health, health literacy, and health behaviors globally now exists. The World Health Organization (WHO) has described this information overload as an infodemic. The Handbook of Research on Cyberchondria, Health Literacy, and the Role of Media in Society's Perception of Medical Information covers a wide range of topics from the characteristics and prevalence of cyberchondria to the pandemic policy response and cybersecurity issues relating to eHealth initiatives and pandemic-related surges in cybercrime. Therefore, this publication has transdisciplinary relevance to professionals from healthcare, government, law enforcement, academia, the technology sector, media, cybersecurity, and education. Graduate and undergraduate students may also find it to be a beneficial resource, not only in terms of the study of cyberchondria but also in terms of the psychological and sociological implications of global crisis events. One of the key messages of this book is as follows: All stakeholders must work together strategically to disseminate authentic public health messages during any global health crisis. They must work to reduce health-related anxiety mediated by technology and seek to improve critical thinking skills and global health literacy.*

Digitalisation and Human Security

A Multi-Disciplinary Approach to Cybersecurity in the European High

North

Springer Nature *This book constructs a multidisciplinary approach to human security questions related to digitalisation in the European High North i.e. the northernmost areas of Scandinavia, Finland and North-Western Russia. It challenges the mainstream conceptualisation of cybersecurity and reconstructs it with the human being as the referent object of security.*

Of Privacy and Power

The Transatlantic Struggle Over Freedom and Security

Princeton University Press *How disputes over privacy and security have shaped the relationship between the European Union and the United States and what this means for the future We live in an interconnected world, where security problems like terrorism are spilling across borders, and globalized data networks and e-commerce platforms are reshaping the world economy. This means that states' jurisdictions and rule systems clash. How have they negotiated their differences over freedom and security? Of Privacy and Power investigates how the European Union and United States, the two major regulatory systems in world politics, have regulated privacy and security, and how their agreements and disputes have reshaped the transatlantic relationship. The transatlantic struggle over freedom and security has usually been depicted as a clash between a peace-loving European Union and a belligerent United States. Henry Farrell and Abraham Newman demonstrate how this misses the point. The real dispute was between two transnational coalitions--one favoring security, the other liberty--whose struggles have reshaped the politics of surveillance, e-commerce, and privacy rights. Looking at three large security debates in the period since 9/11, involving Passenger Name Record data, the SWIFT financial messaging controversy, and Edward Snowden's revelations, the authors examine how the powers of border-spanning coalitions have waxed and waned. Globalization has enabled new strategies of action, which security agencies, interior ministries, privacy NGOs, bureaucrats, and other actors exploit as circumstances dictate. The first serious study of how the politics of surveillance has been transformed, Of Privacy and Power offers a fresh view of the role of information and power in a world of economic interdependence.*

Information and Communications

Technology in Support of Migration

Springer Nature *The book provides a holistic review, presenting a multi-stakeholder, multi-disciplinary, international, and evidence-based approach to Information and Communications Technology (ICT) in migration. The book brings together different views and multifaceted responses to ICT-based migration management, examining their overlap, conflict, and synergies. The book is a major addition to the field, tackling important debates concerning humanitarianism and securitization in the reception of migrants, as well as exploring the role of digital technology in aiding migrant integration. The authors explore contentious areas such as the use of new technologies deployed on borders for migration management and border security under the umbrella of smart border solutions including drones, AI algorithms, and face recognition, which are widely criticized for ignoring the fundamental human rights of migrants. The research presented will depart from the euphoric appraisals that technology has made things easier for migrants and those who assist them, to critically examine the bane and boon, benefits and afflictions, highlighting the barriers, as well as the solutions, including several under-researched aspects of digital surveillance and the digital divide. This edited volume has been developed by the MIICT project, funded under the EU Horizon 2020 Action and Innovation programme, under grant agreement No 822380. Provides a positive approach to the integration of migrants, asylum seekers, and refugees using Information and Communications Technology (ICT) solutions Offers a strategic approach to providing digital services for migrants at an EU, national and local level Bridges the gap between academia and front-line practitioners' work by providing theoretical, policy, ethical, and methodological recommendations*

Data Ethics of Power

A Human Approach in the Big Data and AI Era

Edward Elgar Publishing *Data Ethics of Power takes a reflective and fresh look at the ethical implications of transforming everyday life and the world through the effortless, costless, and seamless accumulation of extra layers of data. By shedding light on the constant tensions that exist between ethical principles and the interests invested in this socio-technical transformation, the book bridges the theory and practice divide in the study of the power dynamics that underpin these processes of the digitalization of the world.*

EU Internet Law

Regulation and Enforcement

Springer *This book provides an overview of recent and future legal developments concerning the digital era, to examine the extent to which law has or will further evolve in order to adapt to its new digitalized context. More specifically it focuses on some of the most important legal issues found in areas directly connected with the Internet, such as intellectual property, data protection, consumer law, criminal law and cybercrime, media law and, lastly, the enforcement and application of law. By adopting this horizontal approach, it highlights – on the basis of analysis and commentary of recent and future EU legislation as well as of the latest CJEU and ECtHR case law – the numerous challenges faced by law in this new digital era. This book is of great interest to academics, students, researchers, practitioners and policymakers specializing in Internet law, data protection, intellectual property, consumer law, media law and cybercrime as well as to judges dealing with the application and enforcement of Internet law in practice.*

E-Democracy – Safeguarding Democracy and Human Rights in the Digital Age

8th International Conference, e-Democracy 2019, Athens, Greece, December 12-13, 2019, Proceedings

Springer Nature *This book constitutes the refereed proceedings of the 8th International Conference on E-Democracy, E-Democracy 2019, held in Athens, Greece, in December 2019. The 15 revised full papers presented were carefully selected from 27 submissions. The papers are organized in topical sections on rrivacy and data protection; e-government; e-voting and forensics; online social networks and "fake news".*

Handbook of Research on Artificial

Intelligence in Government Practices and Processes

IGI Global *In today's global culture where the internet has established itself as a main tool of communication, the global system of economy and regulations, as well as data and decisions based on data analysis, have become essential for public actors and institutions. Governments need to be updated and use the latest technologies to understand what society's demands are, and user behavioral data, which can be pulled by intelligent applications, can offer tremendous insights into this. The Handbook of Research on Artificial Intelligence in Government Practices and Processes identifies definitional perspectives of behavioral data science and what its use by governments means for automation, predictability, and risks to privacy and free decision making in society. Many governments can train their algorithms to work with machine learning, leading to the capacity to interfere in the behavior of society and potentially achieve a change in societal behavior without society itself even being aware of it. As such, the use of artificial intelligence by governments has raised concerns about privacy and personal security issues. Covering topics such as digital democracy, data extraction techniques, and political communications, this book is an essential resource for data analysts, politicians, journalists, public figures, executives, researchers, data specialists, communication specialists, digital marketers, and academicians.*

Big Data, Political Campaigning and the Law

Democracy and Privacy in the Age of Micro-Targeting

Routledge *In this multidisciplinary book, experts from around the globe examine how data-driven political campaigning works, what challenges it poses for personal privacy and democracy, and how emerging practices should be regulated. The rise of big data analytics in the political process has triggered official investigations in many countries around the world, and become the subject of broad and intense debate. Political parties increasingly rely on data analytics to profile the electorate and to target specific voter groups with individualised messages based on their demographic attributes. Political micro-targeting has become a major factor in modern campaigning, because of its potential to influence opinions, to mobilise supporters and to get out votes. The book explores the legal, philosophical and political dimensions of big data analytics in the electoral process. It demonstrates that the unregulated use of big personal data for political purposes not only infringes*

voters' privacy rights, but also has the potential to jeopardise the future of the democratic process, and proposes reforms to address the key regulatory and ethical questions arising from the mining, use and storage of massive amounts of voter data. Providing an interdisciplinary assessment of the use and regulation of big data in the political process, this book will appeal to scholars from law, political science, political philosophy and media studies, policy makers and anyone who cares about democracy in the age of data-driven political campaigning.

Critical Reflections on Constitutional Democracy in the European Union

Bloomsbury Publishing *This book takes a wide-ranging approach to tackle the complex question of the current state of constitutional democracy in the EU. It brings together a broad set of academics and practitioners with legal and political perspectives to focus on both topical and perennial issues concerning constitutional democracy (including safeguarding the rule of law and respect for fundamental rights) in theory and practice, primarily at EU level but also with due regard to national and global developments. This approach underlines that rather than a single problématique to be analysed and resolved, we are presently facing a kaleidoscopic spectrum of related challenges that influence each other in elusive, multifaceted ways. Critical Reflections on Constitutional Democracy in the European Union offers a rich analysis of the issues as well as concrete policy recommendations, which will appeal to scholars and practitioners, students and interested citizens alike. It provides a meaningful contribution to the array of existing scholarship and debate by proposing original elements of analysis, challenging often-made assumptions, destabilising settled understandings and proposing fundamental reforms. Overall, the collection injects a set of fresh critical perspectives on this fundamental issue that is as contemporary as it is eternal.*

Protecting Personal Information

The Right to Privacy Reconsidered

Bloomsbury Publishing *The concept of privacy has long been confused and incoherent. The right to privacy has been applied promiscuously to an alarmingly wide-ranging assortment of issues including free speech, political consent, abortion, contraception, sexual preference, noise, discrimination, and pornography. The conventional definition of privacy, and attempts to evolve a 'privacy-as-a-fence' approach, are unable to deal effectively with the technological advances that have significantly altered the way information is collected, stored, and communicated. Social media such as Facebook pose searching questions about the use and protection of personal information and reveal the limits of conceiving the right to*

privacy as synonymous with data protection. The recent European Union's GDPR seeks to enforce greater protection of personal information, but the overlap with privacy has further obscured its core meaning. This book traces these troubling developments, and seeks to reveal the essential nature of privacy and, critically, what privacy is not.

Digital Citizenship in a Datafied Society

John Wiley & Sons *Digitization has transformed the way we interact with our social, political and economic environments. While it has enhanced the potential for citizen agency, it has also enabled the collection and analysis of unprecedented amounts of personal data. This requires us to fundamentally rethink our understanding of digital citizenship, based on an awareness of the ways in which citizens are increasingly monitored, categorized, sorted and profiled. Drawing on extensive empirical research, Digital Citizenship in a Datafied Society offers a new understanding of citizenship in an age defined by data collection and processing. The book traces the social forces that shape digital citizenship by investigating regulatory frameworks, mediated public debate, citizens' knowledge and understanding, and possibilities for dissent and resistance.*

Data Protection Implementation Guide

A Legal, Risk and Technology Framework for the GDPR

Kluwer Law International B.V. *The complexities of implementing the General Data Protection Regulation (GDPR) continue to grow as it progresses through new and ever-changing technologies, business models, codes of conduct, and decisions of the supervisory authorities, and the courts. This eminently practical guide to implementing the GDPR – written in an original, problem-solving style by a highly experienced data protection expert with equal knowledge of both law and technology – provides a step-by-step project management approach to building a GDPR-compliant data protection system, assessing, and documenting the risks and then implementing these changes through processes at the operational level. With detailed attention to case law (Member State, ECJ, and ECHR), especially where affecting high-risk areas that have attracted scrutiny, the guidance proceeds systematically through such topics and issues as the following: required documentation, policies, and procedures; risk assessment tools and analysis frameworks; children's data; employee and health data; international transfers post-*

Schrems II; data subject rights including the right of access; data retention and erasure; tracking and surveillance; and effects of technologies such as artificial intelligence, biometrics, and machine learning. With its practical examples derived from the author's experience in building GDPR-compliant software, as well as its analysis of case law and enforcement priorities, this incomparable guide enables company data protection officers and compliance staff to advise on key issues with full awareness of the legal and reputational risks and how to mitigate them. It is also sure to be of immeasurable value to concerned regulators and policymakers at all government levels. Handbook on European Data Protection Law

The aim of this handbook is to raise awareness and improve knowledge of data protection rules in European Union and Council of Europe member states by serving as the main point of reference to which readers can turn. It is designed for non-specialist legal professionals, judges, national data protection authorities and other persons working in the field of data protection.

Data Protection and Privacy, Volume 14

Enforcing Rights in a Changing World

Bloomsbury Publishing *This book brings together papers that offer conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy, data protection and enforcing rights in a changing world. It is one of the results of the 14th annual International Conference on Computers, Privacy and Data Protection (CPDP), which took place online in January 2021. The pandemic has produced deep and ongoing changes in how, when, why, and the media through which, we interact. Many of these changes correspond to new approaches in the collection and use of our data - new in terms of scale, form, and purpose. This raises difficult questions as to which rights we have, and should have, in relation to such novel forms of data processing, the degree to which these rights should be balanced against other poignant social interests, and how these rights should be enforced in light of the fluidity and uncertainty of circumstances. The book covers a range of topics, such as: digital sovereignty; art and algorithmic accountability; multistakeholderism in the Brazilian General Data Protection law; expectations of*

privacy and the European Court of Human Rights; the function of explanations; DPIAs and smart cities; and of course, EU data protection law and the pandemic – including chapters on scientific research and on the EU Digital COVID Certificate framework. This interdisciplinary book has been written at a time when the scale and impact of data processing on society – on individuals as well as on social systems – is becoming ever starker. It discusses open issues as well as daring and prospective approaches and is an insightful resource for readers with an interest in computers, privacy and data protection.

Protektion 4.0: Das Digitalisierungsdilemma

Springer-Verlag *Das Buch beschreibt Datenschutz erstmals als Offenheit (Transparenz) statt Datensparsamkeit. Der Autor beschreibt als Voraussetzung dazu einen Besitztitel auf Daten. Die Umsetzung erfolgt über Big Data, deren Techniken so ausgelegt sind, dass Daten zur „handelbaren" Ware werden können, indem dokumentierbar wird, wie von wem wozu Daten verwendet worden sind. Transparente Verwendung auch in Hinsicht auf den Nutzen oder die Notwendigkeit statt Verbergen wird als neues Privatheitsmodell vorgeschlagen. Die Synchronisation der Entwicklung von Technik und Gesellschaft steht dabei im Vordergrund. Zahlreiche Fallstudien erhöhen den praktischen Nutzen des Buches.*

Data Protection and Privacy Under

Pressure

Transatlantic tensions, EU surveillance, and big data

Maklu *Since the Snowden revelations, the adoption in May 2016 of the General Data Protection Regulation and several ground-breaking judgments of the Court of Justice of the European Union, data protection and privacy are high on the agenda of policymakers, industries and the legal research community. Against this backdrop, Data Protection and Privacy under Pressure sheds light on key developments where individuals' rights to data protection and privacy are at stake. The book discusses the persistent transatlantic tensions around various EU-US data transfer mechanisms and EU jurisdiction claims over non-EU-based companies, both sparked by milestone court cases. Additionally, it scrutinises the expanding control or surveillance mechanisms and interconnection of databases in the areas of migration control, internal security and law enforcement, and oversight thereon. Finally, it explores current and future legal challenges related to big data and automated decision-making in the contexts of policing, pharmaceutics and advertising.*

Designing for Privacy and its Legal Framework

Data Protection by Design and Default for the Internet of Things

Springer *This book discusses the implementation of privacy by design in Europe, a principle that has been codified within the European Data Protection Regulation (GDPR). While privacy by design inspires hope for future privacy-sensitive designs, it also introduces the need for a common understanding of the legal and technical concepts of privacy and data protection. By pursuing an interdisciplinary approach and comparing the problem definitions and objectives of both disciplines, this book bridges the gap between the legal and technical fields in order to enhance the regulatory and academic discourse. The research presented reveals the scope of legal principles and technical tools for privacy protection, and shows that the concept of privacy by design goes beyond the principle of the GDPR. The book presents an analysis of how current regulations delegate the implementation of technical privacy and data protection measures to developers and describes how policy design must evolve in order to implement privacy by design and default principles.*

Asian Data Privacy Laws

Trade and Human Rights Perspectives

Oxford University Press, USA *The first work to examine data privacy laws across Asia, covering all 26 countries and separate jurisdictions, and with in-depth analysis of the 14 which have specialised data privacy laws. Professor Greenleaf demonstrates the increasing world-wide significance of data privacy and the international context of the development of national data privacy laws as well as assessing the laws, their powers and their enforcement against international standards.*

The Internet Literacy Handbook

Council of Europe *Over the past decade, Internet technology, now merging into that of mobile technology, has transformed the multiple facets of life in society across the world, changing work and leisure patterns, and placing greater demands on us as active, democratic citizens. The Internet literacy handbook, intended for parents, teachers and young people throughout Europe, is a guide to exploiting to the fullest this complex network of information and communication. The handbook is comprised of 21 fact sheets, each covering a particular topic on Internet use, from searching for information to setting up blogs through to e-shopping and e-citizenship. These fact sheets offer teachers and parents sufficient technical know-how to allow them to share young people's and children's voyages through communication technology. They highlight ethical and safety considerations, give insight into added value in education, provide ideas for constructive activities in class or at home, share best practice in Internet use, and provide a wealth of definitions and links to sites that give practical examples and further in-depth information.*

Global Standard Setting in Internet Governance

Oxford University Press, USA *The book addresses representation of the public interest in Internet standard developing organisations (SDOs). Much of the existing literature on Internet governance focuses on international organisations such as the United Nations (UN), the Internet Governance Forum (IGF) and the Internet Corporation for Assigned Names and Numbers (ICANN). The literature covering standard developing organisations has to date focused on organisational aspects. This book breaks new ground with investigation of standard development within SDO fora. Case studies centre on standards relating to privacy and security, mobile communications, Intellectual Property Rights (IPR) and copyright. The book lifts the lid on internet standard setting with detailed insight into a world which, although highly technical, very much affects the way in which citizens live and work on a daily basis. In doing this it adds significantly to the trajectory of research on Internet standards and SDOs that explore the relationship between politics and protocols. The analysis contributes to academic debates on democracy and the internet, global self-regulation and civil society, and international decision-making processes in unstructured environments. The book advances work on the Multiple Streams Framework (MS) by applying it to decision-making in non-state environments, namely SDOs which have long been dominated by private actors. The book is aimed at academic audiences in political science, computer science, communications, and science and technology studies as well as representatives from civil society, the civil service, government, engineers and experts working within SDO fora. It will also be accessible to students at the postgraduate and undergraduate levels.*

Social policy in the European Union: state of play 2015

The sixteenth edition of Social policy in the European Union: state of play has a triple ambition. First, it provides easily accessible information to a wide audience about recent developments in both EU and domestic social policymaking. Second, the volume provides a more analytical reading, embedding the key developments of the year 2014 in the most recent academic discourses. Third, the forward-looking perspective of the book aims to provide stakeholders and policymakers with specific tools that allow them to discern new opportunities to influence policymaking. In this 2015 edition of Social policy in the European Union: state of play, the authors tackle the topics of the state of EU politics after the parliamentary elections, the socialisation of the European Semester, methods of political protest, the Juncker investment plan, the EU's contradictory education investment, the EU's contested influence on national healthcare reforms, and the neoliberal Trojan Horse of the Transatlantic Trade and Investment Partnership (TTIP).

Interest Groups and Experimentalist Governance in the EU

New Modes of Lobbying

Springer Nature *This book researches the role that interest groups play in new modes of EU governance, with a specific focus on the role of interest representation in experimentalist governance frameworks. The research asks how lobbying in the legislative process contributes to the governance framework and its institutional arrangements and subsequently asks how the relevant interest groups participate in policy implementation – in which broad policy goals are concretised. The research is based on four in-depth case studies: the Industrial Emissions Directive, the General Data Protection Regulation, the Combating Child Abuse Directive, and the Institutions for Occupational Retirement Provision Directive. Of special interest in these cases are the balance between types of interest groups (most notably business and NGOs) in policy formulation and implementation, and the changing dynamics between interest groups and public policy-makers in such 'horizontal' governance. The book's findings are required reading for all those concerned with effective and democratic policy-making in the EU.*

Brussels Versus the Beltway

Advocacy in the United States and the European Union

Georgetown University Press *This book presents the first large-scale study of lobbying strategies and outcomes in the United States and the European Union, two of the most powerful political systems in the world. Every day, tens of thousands of lobbyists in Washington and Brussels are working to protect and promote their interests in the policymaking process. Policies emanating from these two spheres have global impacts—they set global standards, they influence global markets, and they determine global politics. Armed with extensive new data, Christine Mahoney challenges the conventional stereotypes that attribute any differences between the two systems to cultural ones—the American, a partisan and combative approach, and the European, a consensus-based one. Mahoney draws from 149 interviews involving 47 issues to detail how institutional structures, the nature of specific issues, and characteristics of the interest groups combine to determine decisions about how to approach a political fight, what arguments to use, and how to frame an issue. She looks at how lobbyists choose lobbying tactics, public relations strategies, and networking and coalition activities. Her analysis demonstrates that advocacy can be better understood when we study the lobbying of interest groups in their*

institutional and issue context. This book offers new insights into how the process of lobbying works on both sides of the Atlantic.

Bulk Collection

Systematic Government Access to Private-Sector Data

Oxford University Press *This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. This book is the culmination of nearly six years of research initiated by Fred Cate and Jim Dempsey to examine national practices and laws regarding systematic government access to personal information held by private-sector companies. Leading an effort sponsored by The Privacy Projects, they commissioned a series of country reports, asking national experts to uncover what they could about government demands on telecommunications providers and other private-sector companies to disclose bulk information about their customers. Their initial research found disturbing indications of systematic access in countries around the world. These data collection programs, often undertaken in the name of national security, were cloaked in secrecy and largely immune from oversight, posing serious threats to personal privacy. After the Snowden leaks confirmed these initial findings, the project morphed into something more ambitious: an effort to explore what should be the rules for government access to private-sector data, and how companies should respond to government demands for access. This book contains twelve updated country reports plus eleven analytic chapters that present descriptive and normative frameworks for assessing national surveillance laws, survey evolving international law and human rights principles applicable to government surveillance, and describe oversight mechanisms. It also explores the concept of accountability and the role of encryption in shaping the surveillance debate. Cate and Dempsey conclude by offering recommendations for both governments and industry.*

The Politics of International

Migration Management

Springer *Throughout the world, governments and intergovernmental organizations, such as the International Organization for Migration are developing new approaches aimed at renewing migration policy-making. This book, now in paperback, critically analyzes the actors, discourses and practices of migration management.*

Aviation Security, Privacy, Data Protection and Other Human Rights: Technologies and Legal Principles

Springer *This book sheds light on aviation security, considering both technologies and legal principles. It considers the protection of individuals in particular their rights to privacy and data protection and raises aspects of international law, human rights and data security, among other relevant topics. Technologies and practices which arise in this volume include body scanners, camera surveillance, biometrics, profiling, behaviour analysis, and the transfer of air passenger personal data from airlines to state authorities. Readers are invited to explore questions such as: What right to privacy and data protection do air passengers have? How can air passenger rights be safeguarded, whilst also dealing appropriately with security threats at airports and in airplanes? Chapters explore these dilemmas and examine approaches to aviation security which may be transferred to other areas of transport or management of public spaces, thus making the issues dealt with here of paramou nt importance to privacy and human rights more broadly. The work presented here reveals current processes and tendencies in aviation security, such as globalization, harmonization of regulation, modernization of existing data privacy regulation, mechanisms of self-regulation, the growing use of Privacy by Design, and improving passenger experience. This book makes an important contribution to the debate on what can be considered proportionate security, taking into account concerns of privacy and related human rights including the right to health, freedom of movement, equal treatment and non-discrimination, freedom of thought, conscience and religion, and the rights of the child. It will be of interest to graduates and researchers in areas of human rights, international law, data security and related areas of law or information science and technology. I think it will also be of interest to other categories (please see e.g. what the reviewers have written) "I think that the book would be of great appeal for airports managing bodies, regulators, Civil Aviation Authorities, Data Protection Authorities, air carriers, any kind of security companies, European Commission Transport Directorate, European Air Safety Agency (EASA), security equipment producers, security agencies like the US TSA, university researchers and teachers." "Lawyers (aviation, privacy and IT lawyers),*

security experts, aviation experts (security managers of airports, managers and officers from ANSPs and National Aviation Authorities), decision makers, policy makers (EASA, EUROCONTROL, EU commission)"

The Needed Balances in EU Criminal Law

Past, Present and Future

Bloomsbury Publishing *This important volume provides an up-to-date overview of the main questions currently discussed in the field of EU criminal law. It makes a stimulating addition to literature in the field, while offering its own distinctive features. It takes a four-part approach: firstly, it addresses issues of a constitutional nature, such as the EU competence in the field of criminal law, the importance of the principle of subsidiarity and the role played by the different EU institutions. Secondly, it looks at issues linked to the quest of the right balance between diversity and unity, and focuses in particular on the special relationship between approximation and mutual recognition. Thirdly, it focuses on the balance between security and freedom, or, in other words, between the shield and sword functions of EU criminal law. Special attention is given here to transatlantic cooperation, data protection, terrorism, the European Arrest Warrant and the European Investigation Order. Finally, it examines the importance of balanced relations between criminal justice actors.*
