Human Resource Management and the Implementation of Change

[Routledge](#) With the increased pace of global, economical and technological development, change has become an inevitable feature of any organisation to survive in the competitive market. If it is a planned change process, the HR practitioner can use any of the existing general models or theories of change and use suggestive interventions to increase effectiveness and capability to change itself. When the magnitude of change is unpredictable or the degree of the organisational process or systems is unorganised, the existing models or practice of planned change is still in the formative stage, and there is room for continuous refinement and improvement. This book will bridge this gap in the current organisational development and change literature by benefiting the HR practitioner with six real case studies. The cases bring out the interventions adopted, key activities associated with the successful implementation of interventions and the critical role played by HR in achieving organisational effectiveness. This book captures the transformational journey of a diverse set of companies and weaves various dimensions into a common coherent framework for the field of HRM in Change Management. The case studies illustrate six powerful organisational experiences, listing the major activities contributing to effective change management from motivating change, vision, support from key stakeholders, transition management to organisational and HR commitment for implementation. By demonstrating the role of HR as a 'change agent,' this volume will be valuable to researchers, academics, managers and students in the fields of human resource management and change management.

Employment Relations and Hrm in South Korea

Taylor & Francis South Korea is one of the rare countries that has experienced political/industrial democratization and economic development simultaneously in a relatively short period. Comparative Human Resource Management

Contextual Insights from an International Research Collaboration

Routledge Context is increasingly recognised as a critical explanatory variable in accounting for commonalities and differences in human resource management. Giving expression to it in research models holds the prospect of enhancing theory development, deepening our appreciation of embedded practices in diverse territories, and opening up new lines of enquiry. However, contextualisation presents a significant research challenge and increasingly, international academic research networks that bring together scholars from different countries in the co-production of knowledge represent a key approach to rising to this challenge. This volume documents aspects of the development of one such network, namely the Cranet Network on International Human Resource Management, and presents a series of recent contributions from the network. The chapters highlight, inter alia, the limits to convergence in human resource management as a result of contextual determinism, the role of institutional actors, markets, and work regulation in accounting for variations in practices, the contextual specificities and dynamics at play in transition economies, along with key methodological challenges that arise when seeking to build cumulative comparative knowledge via network collaborations of this nature. The chapters in this book were originally published as a special issue of *International Studies of Management & Organization*.
