John Dee's Actions with Spirits (Volumes 1 and 2)

22 December 1581 to 23 May 1583

Routledge *This was originally a two volume set which is now bound as one. Here is presented an investigation of the nature of the earliest extant records of the supposed communication with angels and spirits of John Dee (1527-1608) with the assistance of his two mediums or 'scryers', Barnabas Saul and Edward Kelly. Volume 2 of this work is a transcription of the records in Dee's hand contained in Sloane MS 3188, which has been transcribed only once before, by Elias Ashmole in 1672. Volume 1 is an introduction and thorough commentary to the text which is primarily explaining its many obscurities. The author describes the physical state of the manuscript and its history then continues with a biography of Dee and his scryers and some background to Renaissance occult philosophy. Further chapters address the arguments that the manuscript represents a conscious fraud or a cryptographical exercise and describe the magical system and instruments evolved during the communications or 'Actions'. The last, fascinating chapter examines Dee's motives for believing so strongly in the truth of the Actions and suggests that a principal motive was the conviction, not held by Dee alone, that a new age was about to dawn upon earth.*

Compendium Heptarchia Mystica

Createspace Independent Publishing Platform *De Heptarchia Mystica, or On the Mystical Rule of the Seven Planets, is a book written in 1582-83 by English alchemist John Dee. It is a guidebook for summoning angels under the guidance of the angel Uriel and contains diagrams and formulae. This book consists of detailed instructions for communicating with angels and employing their aid for practical purposes. Written in the form of a personal Grimoire, or handbook of magic, it consists of excerpts and elaborations from Dee's detailed records of his "mystical exercises" found in Mysteriorum Libri Quinque.*

Spiritual and Demonic Magic

From Ficino to Campanella

Penn State Press *First published by the Warburg Institute in 1958, this book is considered a landmark in Renaissance studies. Whereas most scholars had tended to view magic as a marginal subject, Walker showed that magic was one of the most typical creations of the late fifteenth and sixteenth centuries. Walker takes readers through the magical concerns of some of the greatest thinkers of the Renaissance, from Marsilio Ficino, Giovanni Pico della Mirandola, and Jacques Lefevre d'Etapes to Jean Bodin, Francis Bacon, and Tommaso Campanella. Ultimately he demonstrates that magic was interconnected with religion, music, and medicine, all of which were central to the Renaissance notion of spiritus. Remarkable for its clarity of writing, this book is still considered essential reading for students seeking to understand the assumptions, beliefs, and convictions that informed the thinking of the Renaissance. This edition features a new introduction by Brian Copenhaver, one of our leading experts on the place of magic in intellectual history.*

Grimoirium Imperium

The Book of the Old Spirits

Erebus Society "*Imperium*" in Latin means "Power to Command." *Grimoirium Imperium* is a grimoire that contains powerful conjurations and subjugations of Spirits, Demons and Deities which dwell in all the quarters of the earth, the depths of hell and the heights of the heavens, from one's inner soul to the outer layers of the great beyond. The manuscript said that it was the word of Abd Al-Hazred, who had learned much of the secret art of conjuration from avatars and spirits that he met whilst travelling in the desert. "The book attracts many demons to it, even now they will be watching you, invisible. I urge that you pray that they are gone and banish each time you turn a page, otherwise you may find yourself overcome by them, which would doubtlessly mean madness and death." -Dr John Dee

DW 2.0: The Architecture for the Next Generation of Data Warehousing

Elsevier *DW 2.0: The Architecture for the Next Generation of Data Warehousing* is the first book on the new generation of data warehouse architecture, *DW 2.0*, by the father of the data warehouse. The book describes the future of data warehousing that is technologically possible today, at both an architectural level and technology level. The perspective of the book is from the top down: looking at the overall architecture and then delving into the issues underlying the components. This allows people who are building or using a data warehouse to see what lies ahead and determine what new technology to buy, how to plan extensions to the data warehouse, what can be salvaged from the current system, and how to justify the expense at the most practical level. This book gives experienced data warehouse professionals everything they need in order to implement the new generation *DW 2.0*. It is designed for

*professionals in the IT organization, including data architects, DBAs, systems design and development professionals, as well as data warehouse and knowledge management professionals. * First book on the new generation of data warehouse architecture, DW 2.0. * Written by the "father of the data warehouse", Bill Inmon, a columnist and newsletter editor of The Bill Inmon Channel on the Business Intelligence Network. * Long overdue comprehensive coverage of the implementation of technology and tools that enable the new generation of the DW: metadata, temporal data, ETL, unstructured data, and data quality control.*

Therapeutic RNA Nanotechnology

Immunomodulation and Dynamicity

Jenny Stanford Publishing *This collection of research articles and reviews covers the latest work in the design, delivery, dynamic abilities, and immune stimulation of RNA nanoparticles which have driven the utilization of their immunomodulatory properties. The unknown immune properties of nucleic acid nanoparticles have been a major hurdle in their adaptation until the works herein began assessing their structure-activity relationships. This collection chronologically follows the path of investigating the recognition of design components to implementing them into nucleic acid nanostructures. RNA nanotechnology is an emerging platform for therapeutics with increasing clinical relevance as this approach becomes more widely used and approved for the treatment of various diseases. The latest research aims to take advantage of RNA's modular nature for the design of nanostructures which can interact with their environments to communicate programmed messages with intracellular pathways. In doing so, nanoparticles can be used to elicit or elude responses by the immune system as desired in conjunction with their therapeutic applications.*

Tectonics of the Himalaya

Geological Society of London *The Himalayan mountain belt, which developed during the India-Asia collision starting about 55 Ma ago, is a dramatically active orogen and it is regarded as the classic collisional orogen. It is characterized by an impressively continuous 2500 km of tectonic units, thrusts and normal faults, as well as large volumes of high-grade metamorphic rocks and granites exposed at the surface. This constitutes an invaluable field laboratory, where amazing crustal sections can be observed directly in very deep gorges. It is possible to unravel the tectonic and metamorphic evolution of litho-units, to observe the mechanisms of exhumation of deep-seated rocks and the propagation of the deformation. Himalayan tectonics has been the target of many studies from numerous international researchers over the years. In the last 15 years there has been an explosion of data and theories from both geological and geophysical perspectives. This book presents the results of integrated multidisciplinary studies, including geology, petrology, magmatism, geochemistry, geochronology and geophysics, of the structures and processes affecting the continental lithosphere. These processes and their spatial and temporal evolution have major consequences on the geometry and kinematics of the India-Eurasia collision zone.*

ÒI Will Shoot Them from My Loving HeartÓ

Memoir of a South Korean Officer in the Korean War

McFarland *In the spring of 1950, 17-year-old South Korean high school senior Won Moo Hurh dreamed of studying law at Seoul National University after graduation. His life changed irrevocably on June 25 when North Korean forces invaded his homeland. After less than three months of training, Hurh was commissioned as a second lieutenant in the Army of the Republic of Korea and sent to the front, where the casualty rate for such junior officers could reach 60 percent. In this exceptionally well written memoir, Hurh provides not only a descriptive chronicle of his wartime exploits, but also a social and psychological exploration of the absurdity of war in general. Hurh's vivid remembrances bring to life the "forgotten" Korean War from the viewpoint of a Korean officer, a perspective rarely available in English until now.*

Giovanni Boccaccio, Theseid of the Nuptials of Emilia

Peter Lang Pub Incorporated *The first epic poem written in Italian is the Teseida delle nozze di Emilia (Theseid of the Nuptials of Emilia) by Giovanni Boccaccio, the well-known author of the Decameron. Conceived and composed during the Florentine author's stay in Naples, it combines masterfully both epic and lyric themes in a genre that may be defined as an epic of love. Besides its intrinsic literary value, the poem reflects the author's youthful emotions and nostalgia for the happiest times of his life.*

Caught in the Middle

America's Heartland in the Age of Globalism

Bloomsbury Publishing USA *The Midwest has always been the heart of America-both its economic bellwether and the repository of its national identity. Now, in a new, globalized age, the Midwest is challenged as never before. With an influx of immigrant workers and an outpouring of manufacturing jobs, the region that defines the American self-the Lake Wobegon image of solid, hardworking farmers and factory hands-is changing at breakneck speed. As factory farms and global forces displace old ways of life, the United States is being transformed literally from the inside out. In Caught in the Middle, longtime Chicago Tribune reporter Richard C. Longworth explores the new reality of life in today's heartland and reveals what these changes mean for the region-and the country. Ranging from the manufacturing collapse that has crippled the Midwest to the biofuels revolution that may save it, and from the school districts struggling with new migrants to the Iowa meatpacking town that can't survive without them, Longworth addresses what's right and what's wrong in the region, and offers a prescription for how it must change-politically as well as economically-if it is to survive and prosper.*

Whispering Hearts

Samhain Publishing *If he can't defeat the ghosts of her past, she could become one of his. The Summer Park Psychics, Book 2 No one would guess Rachel Montgomery is plagued by a clairsentient talent she can never turn off. She can see and hear ghosts, and ever since she had to kill serial murderer Michael Angelo to save herself, it's only gotten worse. The ghosts of all Michael's victims are making Rachel's life hell. Worse, every ghost in Summer Park wants her to help them find peace. Desperate to get away, she grasps for a lifeline-even though the other end is held by a man she can never have. Dr. Garrett Wolfstrom has always suspected something is different about Rachel, but when she starts hanging poppets in all his windows, he makes one last-ditch effort to get the woman he's always loved to open up to him. Their mutual attraction reaches a flash point just as Rachel's ghosts catch up with her. If they can't find a way to trust each other with their hearts, the most dangerous ghost of all could find a way to settle the score-permanently. Warning: This book contains a sizzlingly sexy doctor, a psychic just coming into her power, and a passion hot enough to beat the summer heat.*
