They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. Aristotle and the Science of Nature

Unity without Uniformity

Cambridge University Press Andrea Falcon's work is guided by the exegetical ideal of recreating the mind of Aristotle and his distinctive conception of the theoretical enterprise. In this concise exploration of the significance of the celestial world for Aristotle's science of nature, Falcon investigates the source of discontinuity between celestial and sublunary natures and argues that the conviction that the natural world exhibits unity without uniformity is the ultimate reason for Aristotle's claim that the heavens are made of a special body, unique to them. This book presents Aristotle as a totally engaged, systematic investigator whose ultimate concern was to integrate his distinct investigations into a coherent interpretation of the world we live in, all the while mindful of human limitations to what can be known. Falcon reads in Aristotle the ambition of an extraordinarily curious mind and the confidence that that ambition has been largely fulfilled.

What Ria learns from this "Prince Kristor" person is that he's an alien sent to help her get in touch with her powers and rescue her from a mortally unfulfilling life here on earth. Good to know. Also good to know the local law enforcement, whom Ria calls after macing Good Prince Naked and running for her life. Problem is, she can't stop "Her books are funny and romantic with the perfect blend of spice!" --Gena Showalter
