## Mentoring and Supervision in Healthcare

SAGE `This book is comprehensive, is underpinned by contemporary policy and research, and adopts a practice and evidence based approach. It will be a very useful reference book and the extensive bibliography supports further reading and exploration' - Jane Lovatt, Senior Lecturer, University of Bolton This authoritative and up-to-date book examines the knowledge base, skills and attitudes required for mentoring students on all healthcare profession courses, and learners. The text explores theories and research on mentoring by analysing their strengths and weaknesses. It also draws upon standards and competencies for mentors and examines how they can be applied to day-to-day mentoring and clinical practice activities. By adopting an analytical and interactive style, the book emphasizes the application of theories and principles to various clinical settings. Key features include: " Comprehensive content - examines learning styles; different learning environments; evidence-based care; principles of assessment; the mentor's leadership, evaluation of teaching " Practice-oriented - case studies offer links to 'real-life' and the chapters provide effective frameworks for mentoring in practice " Interactive - activities and think points encourage the reader to explore and apply concepts to their practice and roles " Up-to-date - firmly based on current knowledge in the field. Mentoring and Supervision in Healthcare is an essential textbook for mentor preparation programmes in nursing, midwifery and related healthcare professions. It aims to support learning and assessment of competencies, as well as continuing professional development for all healthcare professionals. Neil Gopee is a senior lecturer in the Department of Nursing, Midwifery and Healthcare at Coventry University. His teaching and research is primarily focused on mentorship, facilitating continuing learning and management of care.

## Supervision and Mentoring in Healthcare

SAGE This bestselling textbook introduces the theories, evidence and research that define supervision, mentoring, learning and student assessment in healthcare today.

## Mentoring and Supervision in Healthcare

SAGE This practical and accessible book examines the knowledge base, skills and attitudes required for mentoring in the context of healthcare. Revised and updated to take account of the latest developments in healthcare, the text explores theories and research on mentoring by analysing their strengths and weaknesses. To complement his analytical style, Neil Gopee has introduced more interactive features to emphasise the application of theories and principles to various clinical settings. He also draws on the most recent standards and competencies for mentors and supervisors, and examines how they can be applied in day-to-day mentoring and clinical practice activities. Key features include: - Comprehensive content - examines learning styles; different learning environments; evidence-based care; principles of assessment; the mentor's leadership; evaluation of teaching. - Practice-oriented - case studies offer links to 'real-life' and the chapters provide effective frameworks for mentoring in practice. - Interactive - activities and think points encourage the reader to explore and apply concepts to their practice and roles. - Up-to-date - firmly based on current knowledge in the field. Mentoring and Supervision in Healthcare is a core text for mentor preparation courses in nursing, midwifery and across the healthcare sector. It supports learning and ongoing professional development for all healthcare professionals.

## Practice Based Learning in Nursing, Health and Social Care: Mentorship, Facilitation and Supervision

John Wiley & Sons Work-based learning facilitation, mentoring and coaching are all integral to the healthcare professions. Practice Based Learning in Nursing, Health and Social Care promotes effective professional learning in the workplace and helps healthcare professionals to develop, enhance, reflect on and change their practice and perceptions of mentoring, facilitating, and supervision. ## Mentoring Nursing and Healthcare Students

SAGE "This key text offers mentors and students an insight into the relationship between mentorship theory, policy and practice." - Diane Tofts, Kings College London What does effective mentoring mean in actual practice? How can I be a good mentor? This book answers these questions and is designed to offer nursing and healthcare students a foundation in effective mentoring. Chapters examine the roles and responsibilities of the mentor, and how they enhance the process of mentorship. By examining the relevant competencies and knowledge base, the book provides an essential framework for developing the practice skills needed for successful mentoring. Key features include: - Embedded in real-life practice and case study examples - Offers tips for successful mentoring and reflects upon likely challenges - Features a range of interactive study activities linked to the student and mentor's experiences - Presents the most up-to-date professional guidance - Includes running themes of reflective practice; evidence-based practice and multi-professional working. Mentoring Nursing & Healthcare Students will help both the mentor and the student to develop the skills needed for effective collaboration. It is the core text for mentor preparation and mentor update courses in nursing, midwifery and allied health.

## Leadership and Management in Healthcare

SAGE Drawing on the most up-to-date policies and professional regulations, and with an emphasis on the provision of person-centred care, the authors - both of whom have backgrounds in clinical practice, education and management - show how essential leadership and management skills can be applied across a range of situations in everyday practice.

## Practice Teaching in Healthcare

SAGE Practice Teaching in Healthcare is an essential textbook for anyone studying for the Practice Teacher qualification. Encouraging a critical understanding of the knowledge and competence required to fulfil the practice teacher role, the book examines and evaluates the concepts, theories, and frameworks underpinning the necessary skillset. Structured largely around the Nursing and Midwifery Council's standards for Practice Teachers, the book provides comprehensive coverage of the knowledge and skills required to supervise and assess the learning of qualified healthcare practitioners particularly those on post-qualifying specialist or advanced practice programmes, and therefore includes: -Managing inter-professional relationships -Specialist and advanced practice and knowledge -Assessment and accountability -Leadership in facilitation of learning and assessment of clinical skills -Clinical practice development and evidence-based practice, and - Issues and further developments in learning beyond registration. With action points, illustrations and case studies, this is an ideal textbook for healthcare professionals who are students on practice teaching courses, and all facilitators of learning beyond initial registration.

## Essentials of Clinical Supervision

John Wiley & Sons Essentials of Supervision presents, in the popular Essentials format, the key information students need to learn in a course on supervision. Utilizing pedagogical tools such as call-out boxes, Test Yourself questions, and case studies, the author provides step-by-step guidelines for effective planning, goal setting, and evaluation, along with tips for giving constructive feedback and applying coaching strategies to motivate supervisees. She also clearly explains how to manage paperwork and describes specialized techniques, such as using video in supervision. This informative text also includes a special section on ethics authored by a leading expert in the field.

## Understanding Supervision and Assessment in Nursing

SAGE A practical guide for registered nurses in all fields, who are planning to undertake one of the new supervisor or assessor roles outlined in the latest NMC standards. The book helps nurses prepare for the role of practice supervisor, practice assessor or academic assessor, by outlining what is expected in each of the roles, in accordance with the 2018 NMC standards, and explaining which competencies are needed to ensure success in the new supervisory and academic positions. These competencies include: · Understanding how students learn · Understanding how to empower nurses and why this is important · Learning to utilise student feedback to enhance your own development · Identifying the importance of including the participation of service users in nursing governance and quality · Ensuring compliance with all legal, regulatory, professional and educational requirements. It will also be useful for experienced NMC mentors and practitioners looking to update their skills for the new NMC Educational Framework.

# Nursing Supervision

## A Guide for Clinical Practice

SAGE Addressing the practicalities of clinical supervision, this informative book follows the course of the supervision process, illustrating each stage with an absorbing blend of information, opinion, academic theory, anecdotal material, serious comment and thought-provoking exercises. Emphasis is placed on the purpose and value of clinical supervision, but also on the potential pitfalls those involved may encounter, and how they can be avoided. A number of theories and models are discussed with reference to each stage of supervision, providing a thought-provoking basis for the practical issues raised. Written in a lively and engaging style, this book will enable both supervisors and supervisees to get the best they can from the supervisory experience.

## Successful Mentoring in Nursing

Learning Matters Supporting students poses a significant challenge for nurse mentors and other healthcare professionals in today's world of practice. Recent concerns over the fitness to practice of nursing students at the point of registration and the move to all-graduate pre-registration programmes require new approaches to practice learning and mentoring the nurse of the future. The book offers clear practical advice on how to acquire and develop mentorship skills to support degree-level nursing students. It has been fully updated to include more detailed advice on what to do when a student is failing, how to approach assessment and provides more examples of mentoring in community placements. This book is a comprehensive and affordable guide suitable for all nurses, midwives and health professionals undertaking a mentorship course to support nursing students.

## Mastering Mentorship

## A Practical Guide for Mentors of Nursing, Health and Social Care Students

SAGE Publications Limited This book is an essential guide to mentorship in health and social care. The chapters focus specifically on the eight Nursing and Midwifery Council domains for the preparation and training of mentors. A rich range of real-life case studies are included in every chapter, to demonstrate the challenges and dilemmas of mentoring in practice. The chapters cover a range of settings, including community nursing, school nursing, acute care, social work and biomedical science. Learning objectives, chapter summaries and reflective questions are also included to help readers reappraise what they have learned. Mastering Mentorship will be essential reading for both those preparing to become nurse mentors at post-registration level and those already qualified to mentor.

## Mentorship and Clinical Supervision Skills in Health Care

Cengage Learning Emea This fully revised and highly accessible second edition of *Mentorship and Clinical Supervision Skills in Health Care: Learning Through Practice*, from the Nursing and Health Care Practice series, provides all the background, theory and practical knowledge required to be an effective mentor within nursing and health care. The text explores mentorship from the stance of a student and from that of a qualified health care professional, to encourage critical understanding and securing its appeal to professionals and trainees in the field. Completely up-to-date, this text is written in line with the new NMC requirements and provides coverage of key developments in the field including: the role of technologies and e-portfolios in nursing and health care education; the growing importance of experiential learning and the role of reflection; recent changes in assessment techniques and the conceptualisation of validity, reliability and discriminatory power.

## EBOOK: Coaching and Mentoring Supervision: Theory and Practice

## Theory And Practice

McGraw-Hill Education (UK) This highly practical, comprehensive book reflects the increasing professionalization of coaching and mentoring, and the mounting expectation that coaches undergo regular supervision to ensure the quality and safety of their practice, and to encourage their continued professional development. This is the first book to address the full spectrum of coaching and mentoring supervision. The reader gets an opportunity to compare and contrast different approaches and models, and is introduced to theory in a concise, accessible way. The book also: • Clarifies what good coaching and mentoring supervision looks like in different contexts • Provides practical case examples to compliment and shed light on the theoretical bases for coaching/mentoring supervision • Reflects the diversity of perspectives on supervision in coaching and mentoring • Explores alternative ways of delivering and using supervision • Addresses the complex issue of effectiveness and quality of supervision *Coaching and Mentoring Supervision* is the definitive text for coaching supervisors, supervisees and those working toward qualifications in coaching supervision. It will also be of value both to HR professionals and those participating in mentoring programmes. "This book is written in a lucid and interesting manner so the chapters are easy to read individually and allow readers to pick their own path through the knowledge and experience

that this textbook contains. I expect that this book will become an essential source for those seeking qualification in coaching supervision." *Coaching Today*, July 2012

## Leadership and Management in Healthcare

SAGE Now in its Third Edition, this best-selling textbook continues to support you on your journey from being an emerging registered healthcare professional through to becoming a competent care manager. Action points, case studies and strong practice guidelines enable you to understand how leadership and management theory applies to the care you deliver in a wide range of care settings. Fully updated throughout, the new edition includes: More case studies and examples from a wide range of care settings and countries. New key topics such as dimensions of leadership, NHS Change Model, transition to registered practitioner and revalidation requirements, emotional intelligence and resilience. A companion website with access to further case studies, journal articles and web links. This book is essential for nursing, health and social care students taking modules on leadership, management and transition to practice in their final year, as well as for newly qualified professionals or those seeking to refresh their skills.

## Coaching for Effective Learning

## A Practical Guide for Teachers in Health and Social Care

Radcliffe Publishing The aim of this book is to provide a solid grounding in the key principles and practices of coaching and mentoring, to help you think about your practice and what you need to consider as a mentee, coach, mentor or an initiator or sponsor of this activity within your organisation.

## Understanding Medical Education

## Evidence, Theory, and Practice

John Wiley & Sons Created in partnership with the Association for the Study of Medical Education (ASME), this completely revised and updated new edition of *Understanding Medical Education* synthesizes the latest knowledge, evidence and best practice across the continuum of medical education. Written and edited by an international team, this latest edition continues to cover a wide range of subject matter within five broad areas - Foundations, Teaching and Learning, Assessment and Selection, Research and Evaluation, and Faculty and Learners - as well as featuring a wealth of new material, including new chapters on the science of learning, knowledge synthesis, and learner support and well-being. The third edition of *Understanding Medical Education: Provides a comprehensive and authoritative resource summarizing the theoretical and academic bases to modern medical education practice Meets the needs of all newcomers to medical education whether undergraduate or postgraduate, including those studying at certificate, diploma or masters level Offers a global perspective on medical education from leading experts from across the world Providing practical guidance and exploring medical education in all its diversity, Understanding Medical Education continues to be an essential resource for both established educators and all those new to the field.*

## Practical Leadership in Nursing and Health Care A Multi-Professional Approach

CRC Press This multidisciplinary text is an essential introduction to leadership in health care, combining the underpinning theory with a practical approach to help you come to decisions and solutions in everyday practice. \* Written in an accessible and easy to understand style by an international team of practitioners who will engage, inspire and empower you to really make a difference in practice \* Evidence based and with a focus on patient care and service delivery to ensure best practice \* Includes case studies from a range of disciplines as well as questions and reflective activities to help you apply theory to practice \* Provides practical tools from a number of disciplines including NLP, positive psychology, coaching and transactional analysis \* Free HodderPlus website provides PowerPoints, case studies, questions, reflection activities and annotated web links This practical guide is an invaluable tool for all students and professionals in nursing and allied health, including radiographers, physical therapists, occupational therapists, dieticians and paramedics.

## Collaborative Learning in Practice

### Coaching to Support Student Learners in Healthcare

John Wiley & Sons Cited in the 2015 Willis review on nurse education as an exemplary system-wide approach for supporting learning in practice, Collaborative Learning in Practice (CLiP) is an innovative coaching model that empowers students to take the lead in their practice through creating positive learning cultures. Collaborative Learning in Practice provides a detailed description of the CLiP model and explains how coaching can be integrated into a range of learning conversations. Written by an experienced team of practitioners, this unique text describes the theoretical basis of the CLiP model, highlights potential pitfalls and successes, and offers practical guidance on implementation. A wealth of real-world case studies demonstrates how the CLiP model works in a range of professional and practice settings, considering healthcare education, research and leadership. This authoritative book: Provides an overview of the innovative CLiP model of practice-based learning, linked to the NMC standards for student supervision and assessment Offers numerous real-life examples of how to implement and evaluate CLiP in practice Explores the use of reverse mentoring to update and share knowledge collaboratively Discusses how coaching approaches such as GROW and OSCAR can enhance learning experiences Includes access to online learning tools including self-assessment tests, additional practical scenarios and case studies, and links to further reading Developing practitioner knowledge and skill through an accessible, reader-friendly approach, Collaborative Learning in Practice is an essential resource for nursing and allied healthcare educators, nursing and healthcare students, and practice mentors, supervisors, and assessors in clinical environments.

## Student Practice Supervision and Assessment

## A Guide for NMC Nurses and Midwives

Learning Matters Based around the NMC's five pillars of education and training, this book offers clear practical advice on how to acquire and develop supervision and coaching skills to support degree-level students.

## Mentoring, Preceptorship and Clinical Supervision

## A Guide to Professional Roles in Clinical Practice

Wiley-Blackwell Newly qualified nurses often experience difficulties moving from the role of student to qualified nurse. It has been formally recognized that these nurses require a support network to enable them to make this transition smoothly. Preceptorship is an important part of the UKCC's post-registration education and practice proposals. They recommend a period of 4 months under the guidance of a preceptor to enable newly appointed practitioners to achieve confidence within practice. This new edition covers the essential information required to provide learning and support for newly qualified staff. It provides an excellent introduction that is current, relevant and comprehensive in its coverage. Additions to this new edition include coverage of clinical supervision and its relationship to mentoring and preceptorship. This text describes in detail the three main support roles: clinical supervision, mentoring, and preceptorship. These roles are illustrated throughout by case studies.

## Key Concepts in Healthcare Education

SAGE Key Concepts in Healthcare Education is a guide to the key theories, issues and practical considerations involved in healthcare education in the 21st century. It is aimed at those studying to be educators in both academic and practice settings, as well as supporting the continuing professional development of more experienced lecturers and practice educators. The book can be used as a reference source, a platform for further study and an essential text. The book comprises 40 succinct chapters each covering a topic and featuring - a definition of the concept - key points - discussion of the main issues - a case study to illustrate the application to practice, and - suggestions for further reading. For those developing or enhancing their knowledge and skills in education and mentorship in healthcare, Key Concepts in Healthcare Education is the ideal companion to learning.

## Passionate Supervision

Jessica Kingsley Publishers Practitioners working in the helping professions realise the importance of supervision as a space for: reflection; compassionate inquiry; and continuing professional development. This book presents examples of good practice which will help readers to enhance their own supervisory relationships. Robin Shoet brings together supervisors from the fields of consultancy, education, coaching, psychotherapy, youth work and homeopathy, many of whom have been supervising for over 20 years. The contributors explain why supervision continues to be just as important as when they first started, and describe how and why they have managed to stay passionate about their chosen career. The book features numerous case examples to illustrate the different perspectives, demonstrating that supervision is essential and rewarding in a variety of professions. Passionate Supervision is a valuable resource for anyone working in the helping professions, for whom supervision is an integral part of their work.

## Clinical Supervision and Professional Development of the Substance Abuse Counselor

DIANE Publishing Clinical supervision (CS) is emerging as the crucible in which counselors acquire knowledge and skills for the substance abuse (SA) treatment profession, providing a bridge between the classroom and the clinic. Supervision is necessary in the SA treatment field to improve client care, develop the professionalism of clinical personnel, and maintain ethical standards. Contents of this report: (1) CS and Prof;l. Develop. of the SA Counselor: Basic info. about CS in the SA treatment field; Presents the ;how to; of CS.; (2) An Implementation Guide for Admin.; Will help admin. understand the benefits and rationale behind providing CS for their program;s SA counselors. Provides tools for making the tasks assoc. with implementing a CS system easier. Illustrations.

## Narrative-Based Practice in Health and Social Care

## Conversations Inviting Change

Routledge Narrative-Based Practice in Health and Social Care outlines a vision of how witnessing narratives, paying attention to them, and developing an ability to question them creatively, can make the person's emerging story the central focus of health and social care, and of healing. This text gives an account of the practical application of ideas and skills from contemporary narrative studies to health and social care. Promoting narrative-based practice in everyday encounters with patients and clients, and in supervision, teaching, teamwork and management, it presents "Conversations Inviting Change," an established narrative-based model of interactional skills. Underpinned by an account of theory from narrative studies and related fields, including communication theory and systems thinking, it is written for students and practitioners across a broad range of professions in primary and secondary health care and social care. More information about "Conversations Inviting Change" is available at [www.conversationsinvitingchange.com](http://www.conversationsinvitingchange.com). This website includes podcasts, presentations and further teaching material as well as details of forthcoming courses, and is

continually updated with information about the approach described in this book.

## Supervising and Assessing Student Nurses and Midwives in Clinical Practice

### A Practical Guide

Supervising and Assessing Student Nurses and Midwives in Clinical Practice is a practical guide for healthcare practitioners responsible for the supervision and assessment of students. The book is designed to help practice supervisors and practice assessors: to identify and plan for a range of learning opportunities to consider what is possible for learning and assessment in their area to get ready for and deliver the best learning experiences that they can to prepare students for their role as future nurses and midwives. Activities, top tips, examples and scenarios all help the reader to set the principles in context and to support students in achieving the NMC's standards of proficiency. Covering the learning environment and culture, interprofessional supervision, coaching models and feedback, methods and types of assessment, simulation-based learning, and the future of practice learning, the book aims to help individuals and organisations to create the best environment for supporting, supervising and assessing students in practice. "This is a contemporary text that is truly a practical guide that steers and supports. It is written in an accessible and user-friendly way, helping the reader see through the complexities that are inherently associated with practice assessment... I sincerely recommend this book to students and practitioners who learn and practise together with the overall goal of offering high-quality care that is safe and effective."From the Foreword by Professor Ian Peate, OBE FRCN

## Practising Clinical Supervision

### A Reflective Approach for Healthcare Professionals

Elsevier Health Sciences This title is directed primarily towards health care professionals outside of the United States. With contributors from the UK and Australia, the second edition builds on the success of the original, which was praised for engaging readers and being a pragmatic and practice-orientated addition to the literature on clinical supervision. This edition is written in accessible style and will appeal to those both new to clinical supervision or experienced. It provides a thought-provoking, user friendly and practical guide to the subject.

## Coaching as a Leadership Style

### The Art and Science of Coaching Conversations for Healthcare Professionals

Routledge The healthcare environment is in flux. On the one hand, doctors are being driven into ever larger group practices by increasing regulatory and administrative burdens and the need for greater negotiating power. At the same time, growing infrastructure costs and the threat of payment reform is pushing them into closer alignment with hospital systems. This rapidly changing environment requires a more sophisticated set of leadership skills. This book introduces a unique and practical coaching style as a way of interacting with colleagues, managing direct-reports, helping others solve problems, responding to change, making effective choices and developing professionally. It draws from four evidence-based models for interacting with others and facilitating change - solution-focused therapy, cognitive-behavioral therapy, motivational interviewing, and transactional analysis - and reframes them so that they are congruent with managerial and leadership terminology and provide a practical set of methods and tools for today's healthcare leader.

## The Nurse Mentor And Reviewer Update Book

McGraw-Hill Education (UK) A resource for anyone working as a nurse mentor and looking for guidance on how to stay up-to-date, this practical guide explains the ins and outs of competence and is designed to help you judge competence in line with NMC standards.

## Fundamental Themes in Clinical Supervision

Routledge Clinical supervision has been available to nurses for over a decade. This book, edited by leading practitioners in the field, looks at how clinical supervision has developed during this period and what the issues are for the future, including: \* education and training in clinical supervision \* the introduction of clinical supervision into policy and practice \* the practice of clinical supervision within the different nurse specialisms \* current research activity \* international perspectives and experiences. The book is firmly grounded in clinical practice and all the contributors write from real experience. They include clinicians, educationalists, researchers and policy makers from the UK, Finland, America and Australia. Containing the latest research evidence, Fundamental Themes in Clinical Supervision demonstrates the potential of this form of training to support staff and improve client care an essential tool for nurses and other health professionals.

# Mentoring and Supervision in Healthcare

SAGE This practical and accessible book examines the knowledge base, skills and attitudes required for mentoring in the context of healthcare. Revised and updated to take account of the latest developments in healthcare, the text explores theories and research on mentoring by analysing their strengths and weaknesses. To complement his analytical style, Neil Gopee has introduced more interactive features to emphasise the application of theories and principles to various clinical settings. He also draws on the most recent standards and competencies for mentors and supervisors, and examines how they can be applied in day-to-day mentoring and clinical practice activities. Key features include: - Comprehensive content - examines learning styles; different learning environments; evidence-based care; principles of assessment; the mentor's leadership; evaluation of teaching. - Practice-oriented - case studies offer links to 'real-life' and the chapters provide effective frameworks for mentoring in practice. - Interactive - activities and think points encourage the reader to explore and apply concepts to their practice and roles. - Up-to-date - firmly based on current knowledge in the field. Mentoring and Supervision in Healthcare is a core text for mentor preparation courses in nursing, midwifery and across the healthcare sector. It supports learning and ongoing professional development for all healthcare professionals.

## The Future of Nursing

### Leading Change, Advancing Health

National Academies Press The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

## Mentorship in Healthcare 2nd edition

M&K Update Ltd In healthcare settings, the term 'mentorship' is normally used to describe the supervision of a pre-registration student by a qualified practitioner. Mentorship can be very formal or relatively informal. It can also be practised differently in particular locations, settings and healthcare professions. This clear, concise book transcends professional and geographical boundaries in order to focus on the essential characteristics of effective mentorship. It will therefore be useful to a very wide range of healthcare professionals who are involved in mentoring and assessing junior colleagues. The book examines learning theories, teaching and communication skills and assessment methods. It also contains helpful advice on dealing with overseas students and students with special needs. Activities encourage reflection, and quotations and tables enable readers to absorb the content and relate theory to practice. In this second edition, the text has been made even clearer and the authors have added further detail on learning theories such as social constructivism. Most importantly, they have added an Afterword written in the light of reports on the Mid Staffordshire NHS Foundation Trust Public Inquiry. This final section places new emphasis on the mentor's role in helping to ensure that patients receive safe and effective care, which is provided with compassion as well as practical skill. Contents include: Introduction Professional development Teaching and learning Optimising learning in the clinical environment Skills for mentorship Assessment Challenging situations Assessing care and compassion

## Supervision as Transformation

### A Passion for Learning

Jessica Kingsley Publishers Supervision provides a positive space for compassion, inquiry, reflection, and above all development. This title includes chapters that take a practical approach to supervision and show how transformative it can be when approached in the right way.
