Accompanying sample files and tools (Microsoft Word AddIn) can be downloaded from the author's website. From the book cover: Time is one of our most precious commodities-especially to a student completing a Master's or PhD and having to type their own thesis or dissertation, as most 21st century students now do. What would you do with an extra month to work on your dissertation? If you had to assign a financial value to a month, what would that be? That is the bold claim of this book-that typical students with a standard knowledge of Microsoft Word completing a full PhD dissertation who know and use the information provided in this book might be able to submit their dissertation approximately a month earlier (or have an extra month's worth of time to focus on their research work). This claim is made on the basis of the author's extensive experience in assisting students with problems encountered in the typing of their dissertations and teaching these principles to postgraduate students in a focused Microsoft Word training course. But it gets better. The techniques presented in this book do not save time by taking shortcuts that impinge on the quality of the final product. In fact, the focus of these techniques is how to improve the quality of the submitted dissertation by avoiding the mistakes students commonly make as a result of their lack

of knowledge about the features offered by Microsoft Word. In other words, better quality work is obtained by employing techniques that simultaneously allow students to work faster. So what will you do with your month? Microsoft Word 2010 Intermediate [Crisp Pub Incorporated](#) This ILT Series course, rated 5.0/5.0 in overall quality by ProCert Labs, builds on the skills and concepts taught in Word 2010: Basic, First Look Edition. Students will work with styles, sections, and columns and will use the Navigation pane to work with outlines. They will format tables, print labels and envelopes, and work with graphics. They will also use document templates, manage document revisions, and work with Web features. Course manual comes with CertBlaster exam prep software (download). This course will help students prepare for the Microsoft Office Specialist core-level exam for Word 2010 (exam 77-881) and the Microsoft Office Specialist Expert exam for Word 2010 (exam 77-887). For comprehensive certification training, students should complete the Basic, Intermediate, and Advanced courses for Word 2010.
