KEY=MILAN - JOHNSON SHEPPARD

ESSKA Instructional Course Lecture Book

Milan 2021

Springer Nature This book, comprising the Instructional Course Lectures delivered at the 19th ESSKA Congress in Milan in 2021, provides an excellent update on current scientific and clinical knowledge in the field of orthopaedics and sports traumatology. It addresses a variety of interesting and controversial topics relating to the shoulder, elbow, hip, knee and foot, all of which are highly relevant to orthopaedic surgeons' daily practice. Featuring contributions written by leading experts from around the globe, it enables readers to gain a better understanding of pathologies, which in turn can lead to more individualized treatments for patients. The book is of interest to clinicians and researchers alike.

MIAW 2021

2026 Olympic Games and the City

LetteraVentidue Edizioni The MIAW-Milan International Architecture Workshop is the international intensive programme at the Politecnico di Milano - School of Architecture Urban Planning Construction Engineering, that provides an international design forum for schools, teachers, and students, but it is also an informal platform to discuss issues and share ambitions that education implies. It aims to stimulate cross-over thinking between researchers and practitioners in the design field, involving different scales and encouraging an interdisciplinary approach towards design problems. The MIAW 2021 edition focused on the 2026 Winter Olympic Games Milano-Cortina. The workshop experimented with new design approaches to make the Olympic Games physically responsible, socially sustainable, and environmentally friendly.

Social Love and the Critical Potential of People

When the Social Reality Challenges the Sociological Imagination

Taylor & Francis This book unveils the concept of social love as a kind of 'Karst River' that flows through the history of sociology, reassessing it as a form criticism by people in everyday life. Adopting an interdisciplinary perspective, this book offers both theoretical and empirical reflections on social love. It shows that love is not only central to the human experience, but that it can also help to interpret and intervene in social problems such as climate change, poverty, xenophobia, and the (post-)COVID crisis, recognizing people as actors in social change. It explores the idea of love as a key element in the promotion of solidarity and recognition in today's plural and unequal societies. Based on empirical research on social love conducted through both qualitative and quantitative methods, especially in Europe and Latin America, this book explores the social dimension of love. Providing overviews on key questions and studies on current issues, the book is essential reference and resource for researchers, students, social workers, and professionals in social sciences, social philosophy, anthropology, social psychology, sociology of emotions and postmodern literature.

Information and Communication Technology (ICT) Frameworks in Telehealth

Springer Nature This book aims to explore technology solutions and systems to help people in remote areas in order to improve medical care. Access to health care services is critical to good health, but residents of remote areas face a variety of access barriers. The obstacles faced by health care providers and patients in rural areas are very different from those in urban areas. This could be caused by economic factors, cultural and social differences, educational deficiencies, lack of recognition by legislators, and the sheer isolation of living in inland areas, all of which conspire to create health care disparities and hinder people living in inland areas in their struggle to lead normal, healthy lives. Based on available analyses, further progress is needed to promote appropriateness of care, address geographic imbalances in health care use, and prevent the spread of risk factors including chronic diseases and regular health problems. To eradicate these problems, it is essential to develop a telemedicine system with ICT integration that will help patients in inland areas by using contemporary technologies: it would thus be possible for patients to meet their goals using these systems even without the presence of a physician since authenticated prescriptions are generated by doctors and can be transmitted to patients electronically. The volume will contain a number of ideas from researchers who are already working to find solutions and will give insights into exploring innovative methods and new systems developed.

Trade Me

Courtney Milan Tina Chen just wants a degree and a job, so her parents never have to worry about making rent again. She has no time for Blake Reynolds, the sexy billionaire who stands to inherit Cyclone Systems. But when he makes an off-hand comment about what it means to be poor, she loses her cool and tells him he couldn't last a month living her life. To her shock, Blake offers her a trade: She'll get his income, his house, his car. In exchange, he'll work her hours and send money home to her family. No expectations; no future obligations. But before long, they're trading not just lives, but secrets, kisses, and heated nights together. No expectations might break Tina's heart...but Blake's secrets could ruin her life. Trade Me is the first book in the Cyclone series.

Let the Old Dead Make Room for the Young Dead

Faber Stories

Faber & Faber Faber Stories, a landmark series of individual volumes, presents masters of the short story form at work in a range of genres and styles. A chance encounter leads a man to spend the afternoon with an older woman, now a widow, who escaped him fifteen years earlier. Neither of them doubts that the day will end in disgust, but for one intimate moment each finds a way to overcome mortality. Written in 1969, before Milan Kundera was known to English-speaking readers, this story renders male and female characters painful equals, and prompted Philip Roth to admire its 'detached Chekhovian tenderness'.

MINDS 2021

COMPETITION DRAMA

LetteraVentidue Edizioni **MINDS** is an intensive learning model, and as often happens with acronyms, it is a play on words. It is a name, of course, which refers to different ways of thinking. But it is also an abbreviation, which stands for Milano Intensive Design Studio and which, in this sense, indicates a particular teaching model conceived as an international exchange and education platform, activated in the Master's degree program in "Architecture Built Environment Interior" of the Politecnico di Milano.

Directory of American Firms Operating in Foreign Countries

The Procaccini and the Business of Painting in Early Modern Milan

Routledge The book investigates the lives and careers of the Procaccini brothers: Camillo (1561-1629), Carlo Antonio (1571-1631) and Giulio Cesare (1574-1625), the most important family of painters working in northern Italy at the start of the seventeenth century. The Procaccinis' work is here analysed by interconnecting their individual stories and understanding their success as the combination of mutual artistic choices, a high level of specialization and precise business organization. The book looks at this family of painters as entrepreneurs, emphasizing their conscious response to the requests of public and private patrons, as well as their ability to balance instances of originality and imitation in an era characterized by a wide range of artistic opportunities, including religious commissions, national and international patronage and multifaceted markets. This book will be of interest to scholars studying art history, early modern studies, the art market, Italian studies and Italian history.

Ideas of Ambiente

History and Bourgeois Ethic in the Construction of Modern Milan, 1881-1969

Park Publishing (WI) When we hear of Milan, we think of fashion, soccer, or Leonardo da Vinci. Yet Milan is a leading global city economically as well, regarded as one of the "Four Motors in Europe." How did Milan become a city of such importance both economically and artistically? Its remarkable position is the result of the constant modernization Milan undertook throughout the nineteenth and twentieth centuries. The city's upper classes were the main drivers of this development, which made Milan a true metropolis--one that reflected their common interests, rooted in keen entrepreneurship, a sense of history, and their origins. In *Ideas of Ambiente*, Angelo Lunati investigates the relationship among the Milanese upper class, its specific urban culture, and architecture. Lunati realizes his homage to a metropolitan bourgeoisie through the comprehensive concept of "ambiente," reaching beyond the mere built environment to comprise much wider cultural and social aspects as well. *Ideas of Ambiente* invites us to appreciate Milan's architectural trajectory, from its initial romanticism via bold modernism to the elegant yet politically charged aesthetic of the post-WWII period. Lunati demonstrates how the "ambiente" works as a binding agent to which certain neighborhoods owe their environmental unity and how it makes a consistently modern architecture just the latest expression of a historical continuity.

The Milan Institute of Physics

A Research Institute from Fascism to the Reconstruction

Springer Nature This book offers the first comprehensive and authoritative text on the history of physics in Italy's industrial and financial capital, from the foundation of the University of Milan's Institute of Physics in 1924 up to the early 1960s, when it moved to its current location. It includes biographies and a historical-scientific analysis of the main research topics investigated by world-renowned physicists such as Aldo Pontremoli, Giovanni Polvani, Giovanni Gentile Jr., Beppo Occhialini, and Piero Caldirola, highlighting their contributions to the development of Italian physics in a national and international context. Further, the book provides a historical perspective on the interplay of physics and politics in Italy during both the Fascist regime and the postwar reconstruction period, which led to the creation of the CISE (Centro Informazioni Studi Esperienze, a research center for applied nuclear physics, funded by private industries) in 1946, and of the Milan division of the National Institute of Nuclear Physics (INFN) in 1951.

Berlitz: Milan Pocket Guide

Apa Publications (UK) Limited Berlitz Pocket Guide Milan is a concise, full-colour travel guide that gives you reliable, user-friendly information, alongside vivid photography, on Italy's fashion capital. Milan has been Italy's leading fashion centre for years, not to mention its economic powerhouse, but today it's much more - for style and contemporary buzz, no other city comes close. From the sumptuous Gothic cathedral, a magnificent architectural wedding cake in the main piazza, to the chic shops and regenerated canal quarter with its hip bars and cafs, we guide you to the best places to visit and things to do in the city. Green initiatives have improved the city's parks, and on experimental 'no-traffic' days, the city centre is awash with bicycles, and birdsong can be heard coming from palatial secret gardens. To inspire you, we start with a rundown of Milan's Top 10 Attractions, followed by an itinerary for a Perfect Day. The What to Do chapter offers a selection of ways to spend your spare time, from the buzzing nightlife and inimitable shopping to where to get the best coffee. All the essential background information is here, including an overview of the city's history, and how to book the opera or visit Leonardo's Last Supper. There are carefully chosen listings of the best hotels and restaurants in Milan and an A-Z of all the practical information you'll need.

Criminality and Business Strategy

Similarities and Differences

Walter de Gruyter GmbH & Co KG Criminality and Business Strategy: Similarities and Differences explores what can be learned from criminal organizations on four continents based on comparisons of their historical and cultural origins, chosen governance and power structures, and business models. It discusses how these contexts determined their applications of the principles and practice of effective, but amoral leadership, and whether these lessons can be applied to legitimate business enterprises. In this book John Zinkin and Chris Bennett argue that defining a "crime" is a contested issue and that criminality can be viewed as a spectrum, comprising a range of different types of crimes, the harms caused, and the variety of punishments involved. They discuss the critical role of the state in determining where criminality is perceived to sit on the crime continuum. The authors delve into how the state and organized crime are natural competitors, and how organized crime and legitimate businesses are subject to many of the same internal and external strategic considerations. They contend that the resulting similarities between criminality in organized criminal organizations and legitimate businesses are greater than the differences and that the differences are only in degree and not in kind. This thought-provoking study of criminality will be of immense interest to professionals, coaches, consultants, and academics interested in the techniques and ethics of leadership. The book is, in effect, the result of an intellectual journey of the authors from the ideas presented in their earlier book, *The Principles and Practice of Effective Leadership*, to the issues in this book discussing important, difficult, and contested subjects. The journey continues in their third book: *The Challenge in Leading Ethical and Successful Organizations*.
