A haunting tale of morbid voyeurism and masochism, The Piano Teacher, first published in 1983, is Elfriede Jelinek's Masterpiece. Jelinek was awarded the Nobel Prize For Literature in 2004 for her 'musical flow of voices and counter-voices in novels and plays that, with extraordinary linguistic zeal, reveal the absurdity of society's clichs and their subjugating power. The Piano Teacher was adapted into

LITERARY ANTHROPOLOGY

A NEW INTERDISCIPLINARY APPROACH TO PEOPLE, SIGNS AND LITERATURE

John Benjamins Publishing The traditional gulf between the theory and practice of literature and the various areas subjoined under anthropology has hindered the development of some very fruitful perspectives in the realm of poetics and the general theory of literature (particularly in its narrative forms). Poyatos' initial idea of literary anthropology as the study of people and their cultural manifestations through their national literatures - without doubt the richest source of documentation of human life-styles and the most advanced form of our projection in time and space and of communicating with contemporary and future generations - has been enriched by the thoughts of a multi-cultural group of scholars from both anthropology and literature who at a first symposium on the subject attempted to define this area leaving the way open to many more research possibilities.

SENTIMENT ANALYSIS AND OPINION MINING

Morgan & Claypool Publishers Sentiment analysis and opinion mining is the field of study that analyzes people's opinions, sentiments, evaluations, attitudes, and emotions from written language. It is one of the most active research areas in natural language processing and is also widely studied in data mining, Web mining, and text mining. In fact, this research has spread outside of computer science to the management sciences and social sciences due to its importance to business and society as a whole. The growing importance of sentiment analysis coincides with the growth of social media such as reviews, forum discussions, blogs, micro-blogs, Twitter, and social networks. For the first time in human history, we now have a huge volume of opinionated data recorded in digital form for analysis. Sentiment analysis systems are being applied in almost every business and social domain because opinions are central to almost all human activities and are key influencers of our behaviors. Our beliefs and perceptions of reality, and the choices we make, are largely conditioned on how others see and evaluate the world. For this reason, when we need to make a decision we often seek out the opinions of others. This is true not only for individuals but also for organizations. This book is a comprehensive introductory and survey text. It covers all important topics and the latest developments in the field with over 400 references. It is suitable for students, researchers and practitioners who are interested in social media analysis in general and sentiment analysis in particular. Lecturers can readily use it in class for courses on natural language processing, social media analysis, text mining, and data mining. Lecture slides are also available online. Table of Contents: Preface / Sentiment Analysis: A Fascinating Problem / The Problem of Sentiment Analysis / Document Sentiment Classification / Sentence Subjectivity and Sentiment Classification / Aspect-Based Sentiment Analysis / Sentiment Lexicon Generation / Opinion Summarization / Analysis of Comparative Opinions / Opinion Search and Retrieval / Opinion Spam Detection / Quality of Reviews / Concluding Remarks / Bibliography / Author Biography

THE THEORY OF SOCIAL AND ECONOMIC ORGANIZATION

Simon and Schuster This book is an introduction to Max Weber's ambitious comparative study of the sociological and institutional foundations of the modern economic and social order. In this work originally published in German in 1920, Weber discusses the analytical methods of sociology and, at the same time, presents a devastating critique of prevailing sociological theory and of its universalist, determinist underpinnings. None of Weber's other writings offers the reader such a grasp of his theories; none displays so clearly his erudition, the scope of his interests, and his analytical powers.
