Spirituality, Health, and Healing: An Integrative Approach Jones & Bartlett Publishers "Spiritual, Health, and Healing: An Integrative Approach, Second Edition offers healthcare professionals, instructors, and spiritual care providers a comprehensive guide to the most current research on the connection between spiritual practice and health. This updated Second Edition includes new sections on integral spirituality and the New Thought Movement; healing rituals and healing environments; plus new information on spirituality and aging, caring for the elderly, and spiritual hospice."--Résumé de l'éditeur. **Importing Care, Faithful Service Filipino and Indian American Nurses at a Veterans Hospital Rutgers University Press** Drawing on rich ethnographic and survey data collected over a four-year period, Cherry's study explores the role Catholicism plays in shaping the professional and community lives of foreign-born Filipino and Indian American nurses. Their stories provide unique insights into the often-unseen roles race, religion, and gender play in the daily lives of new immigrants employed in American healthcare. Seeing nursing as a religious calling, they care for their patients with a sense of divine purpose but must also confront the cultural tensions and disconnects between how they were raised and trained in another country and the legal separation of church and state. How they cope with and engage these tensions plays an important role in not only shaping how they see themselves as Catholic nurses, but their place in the new American story. **Spiritual Dimensions of Nursing Practice Templeton Press** Ever since the first edition of Verna Benner Carson's *Spiritual Dimensions of Nursing Practice* went out of print, second-hand copies have been highly sought after by practitioners in the field and nursing school faculty who appreciated the comprehensive scope of the seminal work on spirituality and health. In this highly anticipated revised edition, Carson and her co-editor, Harold G. Koenig, have thoroughly revised and updated this classic in the field. The revised edition builds on the foundations laid in the first, providing perspectives on new research in the spiritual dimensions of nursing care, applying nursing theory to spiritual care, and addressing the spiritual needs of both nurses and patients. It also examines ethical issues in nursing and the impact of legal decisions on health care issues. Contributors address issues of spiritual development across the entire lifespan—from the spiritual needs and influences of the very young to the elderly, including those facing chronic illnesses or death. The volume takes a similarly broad approach in addressing spiritual issues from a variety of faith backgrounds—including both theistic and pantheistic religious practices, so that nurses can be prepared to meet the needs of patients from various religious traditions. Second to chaplains, nurses are the major providers of spiritual care, and no other book will serve their needs like *Spiritual Dimensions of Nursing Practice*. **Fundamentals of Nursing The Art and Science of Person-Centered Care Lippincott Williams & Wilkins** Trusted for its holistic, case-based approach, *Fundamentals of Nursing: The Art and Science of Person-Centered Nursing Care, 10th Edition*, helps you confidently prepare the next generation of nursing professionals for practice. This bestselling text presents nursing as an evolving art and science, blending essential competencies—cognitive, technical, interpersonal, and ethical/legal—and instilling the clinical reasoning, clinical judgment, and decision-making capabilities crucial to effective patient-centered care in any setting. The extensively updated 10th Edition is part of a fully integrated learning and teaching solution that combines traditional text, video, and interactive resources to tailor content to diverse learning styles and deliver a seamless learning experience to every student. **Promoting Health in Families Applying Family Research and Theory to Nursing Practice Elsevier Health Sciences** This popular resource addresses all areas of family health with an emphasis on promoting health and wellness and family self-care. Ageing and Spirituality across Faiths and Cultures Jessica Kingsley Publishers Health and social care practitioners are increasingly called upon to provide care to elderly people from a number of different faiths and cultures. This collection of essays examines ageing in the context of the many faiths and cultures that make up Western society, and provides carers with the knowledge they need to deliver sensitive and appropriate care to people of all faiths. Chapters are written by authoritative figures from each of the world's major faith groups about the beliefs and practices of their older people. Christian, Muslim, Hindu, Jewish and Buddhist perspectives are covered, as well as those of ageing veterans and ageing religious sisters. Issues of appropriate care are also addressed, and the book includes recommendations for policy and practice. This accessible and inspiring book will be a useful text for academics, policy makers and practitioners in health and social care, aged care workers, pastoral carers, chaplains and religious professionals, in hospital, residential and other care settings.

For over twenty-five years, George Fitchett has been a pioneering advocate of the view that evidence-based spiritual care can, and should, equally transform chaplaincy. This book collects a key selection from his ground-breaking research. As models of good research practice, these papers demonstrate the real-world value of research and introduce their readers to issues that have continuing importance to spiritual care and professional chaplaincy. As such, this collection offers an ideal introduction to spiritual-care research. The collection is complemented by three essays, specially commissioned from observers well-positioned to comment on future directions for both professional chaplaincy and spiritual-care research. **Fundamental Concepts and Skills for Nursing Elsevier Health Sciences** This market-leading textbook offers an engaging format and clear writing style that make it easy to master the basic nursing concepts and skills you need to practice in a variety of care settings. Its nursing process framework, health promotion focus, emphasis on critical thinking, and thorough coverage of communication and patient teaching provide a strong foundation for your nursing education. Full-color illustrations, critical thinking exercises, and practical examples help you strengthen and apply your knowledge of essential nursing concepts. **Theory of Spiritual Care for Nursing Practice Xlibris Corporation** The author's purpose is to address the issue of establishing the nursing practice of holistic care in hospitals and similar health care agencies as well as in educational programs. The theory of spiritual care for nursing is offered to provide guidance and structure to this effort. Incorporating spirituality into one's own nursing practice or for the entire nursing staff at an agency is probably a most pressing and intangible task facing nursing today. This text is not the final answer, but is offered to provide one perspective that may provide direction for an ecumenical approach and serve as a theoretical guide for nurse educators in teaching spiritual care to nursing students as well as for nursing leaders and their nursing staff in developing a plan of implementation appropriate to an individual agency. **Choice Publication of the Association of College and Research Libraries, a Division of the American Library Association** **Foundations and Adult Health Nursing Elsevier Health Sciences** An all-inclusive guide to fundamentals and medical-surgical nursing for the LPN/LVN, *Foundations and Adult Health Nursing, 7th Edition* covers the skills you need for clinical practice, from anatomy and physiology to nursing interventions and maternity, neonatal, pediatric, geriatric, mental health, and community health care. Religion and Medicine A History of the Encounter Between Humanity's Two Greatest Institutions Oxford University Press, USA "In Religion and Medicine, Dr. Jeff Levin, distinguished Baylor University epidemiologist, outlines the longstanding history of multifaceted interconnections between the institutions of religion and medicine. He traces the history of the encounter between these two institutions from antiquity through to the present day, highlighting a myriad of contemporary alliances between the faith-based and medical sectors. Religion and Medicine tells the story of: religious healers and religiously branded hospitals and healthcare institutions; pastoral professionals involved in medical missions, healthcare chaplaincy, and psychological counseling; congregational health promotion and disease prevention programs and global health initiatives; research studies on the impact of religious and spiritual beliefs and practices on physical and mental health, well-being, and healing; programs and centers for medical research and education within major universities and academic institutions; religiously informed bioethics and clinical decision-making; and faith-based health policy initiatives and advocacy for healthcare reform. Religion and Medicine is the first book to cover the full breadth of this subject. It documents religion-medicine alliances across religious traditions, throughout the world, and over the course of history. It summarizes a wide range of material of relevance to historians, medical professionals, pastors and theologians, bioethicists, scientists, public health educators, and policymakers. The product of decades of rigorous and focused research, Dr. Levin has produced the most comprehensive history of these developments and the finest introduction to this emerging field of scholarship."--

Enhancing Nurses' and Midwives' Competence in Providing Spiritual Care Through Innovative Education and Compassionate Care Springer Nature This book is the first of its kind, addressing key issues in the teaching and learning of spirituality and spiritual care in the context of nursing and midwifery practice. The content is based on the outcomes of a European-wide project (EPICC) that brought together leading nursing and midwifery educators and practitioners from 21 countries. It highlights the importance of ensuring student nurses' and midwives receive sufficient educational preparation to provide spiritual/person-centred care. In turn, the book puts forward an innovative and creative approach to the teaching of spiritual/person-centred care, based on an evaluation of best practice across Europe. The content and activities presented will enable nursing and midwifery educators to acquire new knowledge/skills for learning about and teaching on the personal, religious and spiritual aspects of person-centred care. Both interactive and engaging, it will equip nursing and midwifery students to holistically address the needs of the people they care for. The book has the potential to transform the nursing and midwifery workforce of the future by ensuring they are prepared to face the global challenges that are impacting international nursing and midwifery practice.

Spirituality, the search for meaning in life and connection to others, remains relevant to all patient interactions, and an essential component for nurses to integrate into their everyday practice. Using a multicultural and client-centered approach, chapters explore the concept of spirituality, and its relationship with religion and health to directly place spirituality in a nursing context. Reflection questions interspersed throughout encourage the reader to analyze their own experiences with spirituality within both professional and personal contexts and affirm how a nurse's own spirituality can influence her or his practice. Practical exercises illustrate the importance of spirituality in nursing and provide tools and means to incorporate spirituality into clinical practice. Chapters use a flexible approach that can be adapted to a variety of contexts in nursing education and practice throughout North America and beyond, applicable for self-study, traditional courses, and on-line programs. They contain a wealth of pedagogical features including case studies, discussion questions, a comprehensive bibliography, and an extensive Instructor's Manual that provides additional direction for discussion and testing. Thirteen videos, developed by the author and available online, provide the perspectives of nursing and health care professionals, clients, and families to illustrate the main points of the text. Mental Health Nursing Elsevier Health Sciences Rev. ed. of: *Foundations of psychiatric mental health nursing* / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010. **Library Journal Integrating Spirituality into Counseling Methods and Practices Taylor & Francis** *Integrating Spirituality into Counseling* uses the Christian tradition as a starting point for developing a universal frame of reference and is predominantly based on an existential approach to counseling, one that is applicable to several faith traditions as well as spiritual but nonreligious audiences. The chapters of this book proceed from the theoretical toward the more practical, in a logical fashion, allowing a clear distinction between different topics, starting from meta-reflection and finishing with practical applications. The design of the book allows students to focus on whatever is of importance to them; each chapter is self-contained and can be read independently of the others. *Integrating Spirituality into Counseling* is designed for students of counseling, pastoral care, spirituality, theology, and chaplaincy. It will provide readers with the tools they need to work with spiritual issues across traditions. Students will also find advice for when to refer clients to religious leaders or ministers, and they'll also deepen their understanding of the ways in which spirituality influences one's life.

Davis** *How do you perceive your cultural identity? All of us are shaped by the cultures we interact with and the cultural backgrounds and ethnicities that are part of our heritage. Take a dynamic approach to the study of culture and health care relationships. Dr. Marilyn A. Ray shows us how cultures influence one another through inter-cultural relationships, technology, globalization, and mass communication, and how these influences directly shape our cultural identities in today's world. She integrates theory, practice, and evidence of transcultural caring to show you how to apply transcultural awareness to your clinical decision making. Go beyond common stereotypes using a framework that can positively impact the nurse-patient relationship and the decision-making process. You'll learn how to deliver culturally competent care through the selection and application of transcultural assessment, planning and negotiation tools for interventions.* **Spiritual Care and Transcultural Care Research Quay Books** *This book brings together in an accessible format the empirical studies of spiritual and cultural care by the author. The purpose of the text is to share with readers evidence-based practice in the light of a series of studies, which will give spiritual and cultural care in a variety of clinical settings. The book uniquely demonstrates the relevance of spiritual and cultural care as dimensions of practice which are central to the promotion of well-being and healing. The book is a useful resource for healthcare practitioners, researchers, lecturers, students and others who are interested in spiritual and cultural care. It also offers a model for a sustained, coherent approach to cultural and spiritual care research for researchers and others interested in this area of care.* **Handbook of the Psychology of Religion and Spirituality, Second Edition Guilford Publications** *Paloutzian (experimental and social psychology, Westmont College) and Park (psychology, U. of Connecticut) provide a 33-chapter handbook on the psychology of religion and spirituality, for social and clinical psychologists, pastoral counselors, and students and researchers in psychology and religious studies. Psychologists and a few religious studies specialists from the US and some countries in Europe address the foundations, including definitions, core issues, measurement assessment, research methods, psychodynamic psychology and religion, and evolutionary psychology as a foundation for the psychology of religion; religious and spiritual development across the lifespan; and the neural and cognitive bases of religion and connections to emotion, personality, culture, and social behavior. They discuss religious practices and rituals, conversion experiences, prayer, spiritual struggles, fundamentalism, forgiveness, values, and morality, and implications for individual and collective well-being in terms of health, mental health, coping, psychotherapy, workplace spirituality research, terrorism, and other areas. New topics in this edition include cross-cultural issues, spiritual goals, emotional values, and mindfulness. Most chapters have been redesigned or rewritten, with 25 new and eight revised chapters. The main themes of the book are more integrated, and the introductory and concluding chapters argue that the application of religious meaning systems and the multilevel interdisciplinary paradigm can allow reconceptualization of the field and expand research. For the last 8 years, it has remained the only text solely focused on the vital role of nurses in palliative care. During this time, the COMFORT model was taught to nurses nationwide who brought the curriculum back to their own institutions and taught components of the model to more than 10,000 healthcare providers across the United States (Wittenberg, Ferrell, Goldsmith, Ragan, & Buller, 2017). Numerous journal articles and research studies have been produced to highlight the principle components of the COMFORT model and test its effectiveness among healthcare audiences across a variety of clinical and educational settings. Through this all, as the model was disseminated to clinical*

audiences of bedside nurses, nurse leaders, nursing students, and interprofessional learners, feedback was captured about COMFORT. Comments revealed major components of the model that were working and weren't working for the nurses and other healthcare providers who utilized the strategies with patients and families, and began using curriculum tools for teaching and integrating palliative care communication instruction. So, much like the model's grounding in a transactional communication approach, which relies on the co-created interaction between parties, it was clear that the COMFORT model was also ebbing and flowing and had to change. More importantly, palliative care has been growing, changing, expanding, and becoming more sophisticated, more wide-spread! Now more than ever before, palliative care is provided in the home, clinic, or inpatient setting and serves patients who are seriously or chronically ill and their families. It became evident that in order to continue improvements to the model and to keep up with the changing landscape of palliative care and palliative patient populations, a new edition was necessary. Before we highlight the changes, it is never too early to overstate our steadfast commitment to the following principles: We believe that communication research and theory can shape palliative care practices, providing tools for a variety of contexts. We believe that palliative care, offering compassionate, holistic treatment for patients and their families, will not be possible without caring for the entire person (body and mind). We believe that communicating about palliative care must begin at diagnosis of serious illness, not just at end-stages. We believe in a patient-centered approach to communication that emphasizes the role of the family caregiver in the illness trajectory. We believe that intentional communication emphasizing team processes among physicians, nurses, social workers, chaplains, and other healthcare professionals improves palliative care practice. We believe that palliative care should be introduced early in the communication education of all health professionals. We believe that education about palliative care and communication must extend to patients and families who can then advocate for and partner more productively in such services. We believe that communication with the family caregiver is essential for the treatment of pain and symptom management. We believe that frequent conversations are needed across the disease/care trajectory, as patients and families encounter ongoing points of decision-making"-- **Willard and Spackman's Occupational Therapy Lippincott Williams & Wilkins** Willard and Spackman's Occupational Therapy, Twelfth Edition, continues in the tradition of excellent coverage of critical concepts and practices that have long made this text the leading resource for Occupational Therapy students.
