Improved lasing techniques in the cardiac catheterization suites and operation rooms have been implemented for treatment of ischemic coronary syndromes, peripheral arterial occlusive disease and other atherosclerotic thrombotic conditions. Moreover, during this 20 year time frame, several multicenter and single center clinical studies have been published focusing on the role and utilization of lasers in coronary and peripheral revascularization. And within the rapidly expanding field of interventional cardiac electrophysiology, laser technology has recently revolutionized the management of fractured, abandoned and malfunctioning leads of cardiac pacemakers and automatic defibrillators. Consequently, replacing a notoriously cumbersome and high risk open heart surgery with safe and markedly efficient percutaneous laser based extraction. The author's contribution provides an important analysis of the interplay between state craft and military operational planning and execution. The study addresses not only questions of planning and deployment but the course of the intervention from the landing of marines to evacuate American citizens, through the commitment of the 82d Airborne Division to separate the combatants in the Dominican civil war, to the establishment of the ad hoc Inter- American Peace Force, the First hemispheric military organization of its kind. The United States intervention in the Dominican Republic was successful. It accomplished the mission of preventing a Communist takeover and providing the military presence to make a political settlement possible. Nevertheless, Power Pack experienced its share of problems associated with outdated operations plans, poor communications and coordination, hasty planning, and inadequate staff and facilities. This study's true value lies in the identification of these problems in an effort to understand why they occurred and to prevent their recurrence. **Study and Master Creative Arts Grade 7 for CAPS Teacher's Guide Educational Technology Program and Project Evaluation** Routledge *Educational Technology Program and Project Evaluation is a unique, comprehensive guide to the formative and summative evaluation of programs, projects, products, practices and policies involving educational technology.
