Tourism, 2nd Edition

CABI Fully revised, **Tourism, 2nd edition** covers aspects of tourism from a modern perspective, providing students with a range of theoretical and research-based explanations, supported by examples, case studies and unique insights from industry representatives. Covering topics such as policy and planning, heritage management, leisure management, event management and hospitality management, the book tackles the practical elements of academic tourism such as infrastructure management and economic development, together with other important contemporary issues such as

sustainable development and post-tourists.

The Encyclopedia of Sustainable Tourism

CABI Tourism is the world's fastest growing industry, and impacts globally upon ecology, economies, peoples, cultures and the built environment. Development, therefore, must be sustainable and sympathetic in order to preserve the environment and culture it exploits. Despite sustainable tourism being an area of considerable recent interest, there has been no synthesis of the diverse considerations of sustainable tourism, and the language and terms particular to this subject. An important resource for researchers of tourism, this reference work defines and explains terms associated with considering and preserving the environment, host peoples, communities, cultures, customs, lifestyles and social and economic systems.

The Encyclopedia of Ecotourism

CABI The Encyclopedia of Ecotourism provides an expert, state-of-the-art and comprehensive knowledge base of the rapidly growing global ecotourism sector. It is divided into eight major sections, and contains 41 chapters, individually authored by international researchers and practitioners in ecotourism. Each chapter combines theory and practice in a complementary way. The scope of the encyclopedia includes definitions and other contextual material, regional perspectives, venues, impacts, planning and management considerations, and issues associated with ecotourism businesses, research and training.

Routledge Handbook of Ocean Resources and Management

Routledge This comprehensive handbook provides a global overview of ocean resources and management by focusing on critical issues relating to human development and the marine environment, their interrelationships as expressed through the uses of the sea as a resource, and the regional expression of these themes. The underlying approach is geographical, with prominence given to the biosphere, political arrangements and regional patterns - all considered to be especially crucial to the human understanding required for the use and management of the world's oceans. Part one addresses key themes in our knowledge of relationships between people and the sea on a global scale, including economic and political issues, and understanding and managing marine environments. Part two provides a systematic review of the uses of the sea, grouped into food, ocean space, materials and energy, and the sea as an environmental resource. Part three on the geography of the sea considers management strategies especially related to the state system, and regional management developments in both core economic regions and the developing periphery. Chapter 23 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. <https://www.routledgehandbooks.com/doi/10.4324/9780203115398.ch23>

Cruise Tourism in Polar Regions

Promoting Environmental and Social Sustainability?

Routledge Cruises are the primary form of tourism in the Polar Regions and cruise ship tourism in both the Arctic and Antarctic is expanding rapidly. The industry has moved beyond its infancy, and is now entering a maturing phase with increased numbers and types of vessels, more demanding routes, and more regular and predictable patterns of activity. The increase in cruise activities, and the associated risks of accidents, as well as the potential and actual impacts of the large numbers of tourists in the polar regions bring with it management challenges for sustainable use of these regions. This book discusses critically the issues around environmental and social sustainability of the cruise

industry in Polar Regions. Authors from Canada, USA, Europe, Australia and New Zealand are experts in their respective fields and take an innovative, critical and at times controversial approach to the subject.

Marine Wildlife and Tourism Management

Insights from the Natural and Social Sciences

CABI This book seeks to underscore the need for scientific approaches to first understanding and then managing tourist interactions with marine wildlife. It draws upon the work of leading natural and social scientists whose work serves the interests of sustainable wildlife-based marine tourism. Thus from within the natural science disciplines of marine biology, environmental science, behavioural ecology, conservation biology, and wildlife management come chapters that provide insights into the effects of human disturbance on marine wildlife, the impacts that tourists may have upon wild animals, and the management approaches to mitigating impacts that may in the long term be biologically significant. Equally from the social science disciplines of geography, sociology, management and social anthropology are drawn chapters that explore demand for marine wildlife experiences, the benefits that visitors derive from their experiences, ethical and legislative contexts, and management issues that arise when tourists interact with populations of wild animals in coastal and marine environments.

Tourism in European Microstates and Dependencies Geopolitics, Scale and Resource Limitations

CABI Tourism in European Microstates and Dependencies carefully examines the nuances and realities associated with tourism, social and economic development, geography, and geopolitics of Europe's smallest microstates and dependencies. Through case study-based material, the book covers the smallest states of Europe, the European dependencies inside Europe, and other unique territorial anomalies and unrecognized de facto states. It looks at how, besides small size and economy of scale, one of the characteristics that connects these unique states and territories is their dependence on tourism, or their desire to develop it, for their socio-economic well-being.

Tourist Behaviour

Themes and Conceptual Schemes

Channel View Publications Tourism is an inherently social phenomenon. Tourists travel with others and experience places and cultures through interacting with both familiar and unfamiliar others. This volume presents a thorough tour of the social psychological processes which underpin contemporary travel. The fascinating phenomenon of tourist behaviour deals with topics such as motivation, destination choice, travellers' on site experiences, satisfaction and learning. This book uses an array of developing and recently constructed conceptual frameworks to both synthesise what is established, and to create new insights and directions for further analysis and, ultimately, management action.

The Geography of Tourism and Recreation

Environment, Place and Space

Routledge This fourth edition of *The Geography of Tourism and Recreation* provides students with a comprehensive introduction to the interrelationship between tourism, leisure and recreation from geographical and social science perspectives. It still remains the only book to systematically compare and contrast in a spatial context, tourism and recreation in relation to leisure time, offering insight into the demand, supply, planning, destination management and impacts of tourism and recreation. Whilst retaining its accessible style and approach this edition has been significantly updated to reflect recent developments and new concepts from geography which are beginning to permeate the tourism and recreational field. New features include: Content on the most recent developments, climate change, sustainability, mobilities and crisis management in time and space as well as trends such as low cost airlines and the

control of land transport by transnational operators in the EU such as Arriva. More attention to management issues such as innovation and the spatial consequences for tourism and leisure development. New case studies and examples to showcase real life issues, from both developed and developing countries, especially the US, China and South Africa. Completely revised and redeveloped to accommodate new, user- friendly features: case studies, insights, summary points and learning objectives. Written by leading academics, this is essential reading for all tourism, geography, leisure and recreation students.

Ontario, Ministry of Tourism and Recreation

The Geography of Recreation and Leisure

Routledge Originally published in 1972, this book discusses changing attitudes to work and leisure and patterns of leisure activity, asking if recreation, as an economic activity, a distinctive spatial expression. It examines characteristics of spa towns and coastal resorts in the nineteenth century as well as provision of leisure amenities in urban and rural areas of contemporary Britain and the changing levels of demand for and supply of recreation in North America.

Spiritual and Religious Tourism

Motivations and Management

CABI This book reviews tourist motivations for making religious or spiritual journeys, and the management aspects related to them. It explores sacred journeys across both traditional religions such as Christianity and Islam, and newer forms of pilgrimage, faith systems and quasi-religious activities such as sport, music and food. Demonstrating to the reader the intrinsic elements and events that play a crucial role within the destination management process, it provides a timely re-assessment of the increasing interconnections between religion and spirituality as a motivation for travel. Providing researchers and students of tourism, religious studies, anthropology and related subjects with an important review of the topic, this book aims to bridge the ever-widening gap between specialists within the religious,

tourism, management and education sectors.
